

Lenovo launched a 2-mode Flex 2 laptop

Lenovo has just launched a new laptop called Flex 2 with the emphasis that it can be used in two different modes (dual-mode) and upgraded performance.

Lenovo has just launched a new laptop called Flex 2 with the emphasis that it can be used in two different modes (dual-mode) and upgraded performance.

Accordingly, the Flex 2 is a device designed with 2 modes, Laptop and Stand. With Laptop mode, users can use as normal laptops. In Stand mode, users can flip 300 degrees to use as a tablet with a stand (*with a keyboard holder*).

Besides, Flex 2 also comes with a powerful configuration including Full HD screen (*option 2 sizes 14 inch and 15.6 inch*), running Intel Haswell Core i7 VXL, NVIDIA GeForce graphics card. For those who love AMD chips, AMD APU and Radeon R5 M230 graphics cards are the alternatives.

"With Flex 2, users like being owning 2 devices, one is a laptop with a high resolution and two is a MTB with smooth multi-touch screen, integrating a lot of latest technologies to help users. can better manage work and entertainment, ' said Dilip Bhatia, currently in charge of Lenovo's PC division .

Expected, the Flex 2 will go on sale in June with two black and silver colors, starting at \$ 429.
