

Lenovo launches a voice chat computer

Lenovo has just introduced new ThinkPad Yoga products aimed at business users. The product has a powerful configuration, handy and special hybrid design that can 'chat' with voice.

Lenovo has just introduced new ThinkPad Yoga products aimed at business users. The product has a powerful configuration, handy and special hybrid design that can 'chat' with voice.

The machine is specially designed for business people. Although borrowing the flip and folding design of *Yoga* line, *ThinkPad Yoga* possesses the famous features of the Think line that *Yoga* laptops do not have such as strong security, reliability and manageability.

It owns a 12.5-inch magnesium alloy screen with HD IPS screen using *Corning Gorilla Glass* toughened glass or *FHD IPS screen* (*this screen has the option of digitizer pen or pen*) running on the platform. Windows 8.1 operating. The large 10-point touchpad and glass *trackpad* are optimized for gesture manipulation.

Moreover, *the ThinkPad Yoga* is equipped with a unique lifting and locking system exclusively for *tablet mode* (*tablet*). When folding the device in tablet mode, the system will automatically raise the border around the key and lock the keys of the keyboard again.

In terms of configuration, it has the power of Intel's 4th generation processor (*Haswell*) up to Core i7, 500GB hard drive (*equivalent to the capacity of 250 DVD movies*) and the battery capacity is up to full working day. In particular, ThinkPad Yoga also has a touch feature with voice, so users can "chat" on **Yahoo Messenger** software, play music, surf the web . without using the finger.

The product is sold at a starting price of about VND 25 million.
