

Lenovo launches ThinkBook X AI 2024

Lenovo has officially introduced the ThinkBook Needs to move a lot.

ThinkBook X AI 2024 embodies cutting-edge technology and high performance. The highlight of this computer is its ability to balance powerful performance and portability. With a weight of about 1 kg, Lenovo products are capable of meeting all work needs while still maintaining convenience.

Lenovo's latest laptops use 12th generation Intel Core Ultra CPUs, including Core Ultra 5 125H and Core Ultra 9 185H. This provides outstanding performance, while also making the machine more efficient and energy efficient.

Built on the Intel Evo platform, ThinkBook

In addition, Lenovo also equips the ThinkBook X AI 2024 with LPDDR5x memory and a PCIe 4.0 SSD hard drive, ensuring powerful processing speed and storage capacity. This helps the machine run faster, while enhancing multitasking capabilities and storing data safely.

The product has been launched in the Chinese market, with sustainability in mind, meeting MIL-STD-810H standards for durability and complying with neutrality standards. The machine's price ranges from 1,035 to 1,381 USD.
