

# Lenovo stirred up the summer laptop market with IdeaPad Y460

This is a laptop model with a powerful integrated design, focusing on entertainment needs

**This is a laptop model with a powerful integrated design, focusing on entertainment needs .**

This machine is more powerful but smaller than the Y550P version. Compared to the previous series, Lenovo has invested quite a bit in the form of the Y460. The design of the machine has an eye-catching appearance with a hexagonal crust on the black background, dotted around the lid is a bronze border.

The interior "interior" when opening the lid is a blend of not-so-glossy black plastic and plastic tones of the same color. But the most eye-catching point is the backlit touch-sensitive keyboard above the keyboard, and a small IdeaPad backlit logo on the bottom and right of the keyboard.

With these unique touch controls, users can easily access functions such as increasing / decreasing sound, activating Power Manager and OneKey Theater to increase image quality. photos when watching movies. Besides, SlideNav key cluster helps quickly turn on applications such as computers, notepad, recording . or other applications that users can optionally add. You can also change the background image by sliding your finger on the SlideNav key from right to left, or "screen lock" when sliding from left to right (then, the device will temporarily disable the function of the keyboard, the key mouse and touchpad). This is a feature not available on previous Lenovo models.

## Function

The "screen lock" feature is quite unique, helping to switch the screen saver mode and keyboard lock, touchpad and mouse function keys.

The keyboard of the Y460 is quite spacious, with a slightly different look of the ThinkPad. The keys are wide and reasonable. Touch-sensitive touchpad with smooth surface gives comfort when manipulating fingers to hover around the screen and perform multi-touch gestures from click to zoom in / out. The right / left key of the mouse is located just below the mouse touchpad, which is also highly sensitive.

A notable feature of IdeaPad Y460 that previous Y450 "elder" models do not have is the built-in JBL speaker duo above the keyboard, for good sound quality.

The 14-inch wide screen uses LED-backlit technology (resolution of 1,366 x 768) with glossy borders for brilliant images and wide viewing angles. The Y460 has an integrated Ambient Light Sensor, which adjusts screen brightness in different lighting environments.

Wide screen LED-backlit 14 inches with 1.3 megapixel camera.

IdeaPad Y460 is equipped with an Intel Core i3 processor with a speed of 2.26 GHz, 2 GB of DDR3 RAM, a discrete graphics card with the latest ATI 5650 DDR3 1024M conversion technology, making the machine stable and smooth, even in a multi-tasking environment. Y460 is also Lenovo Enhanced Experience certified for the Windows 7 operating system, so the startup / shutdown time is very fast.

The feature of video card conversion software is also a highlight of the Y460 series (for models with separate ATI cards), users can easily transfer the usage of Intel Graphics Media Accelerate HD card. to discrete ATI Radeon HD 5650 card and vice versa. For most tasks, even watching HD movies, the Intel integrated card mode is more reasonable. However, the discrete card allows executing tasks that require higher image processing capabilities, costing more resources such as high-profile gaming, or displaying GoogleEarth images with more details.

With a 6-cell battery, IdeaPad Y460 can operate continuously for more than 2 hours and 30 minutes when watching DVD movies (using an integrated video card) and about 4 hours when using common tasks. The device is fully equipped with VGA, HDMI, USB ports, SATA, Ethernet ports, headphone and mic jacks, ExpressCard card slot, DVD drive, wifi b / g / n and receive features. VeriFace™ Face Recognition face format, Dolby Home Theater and other Lenovo support software.

**Currently Lenovo IdeaPad Y460 is sold in Vietnam for about 16 million VND without tax** (for models without an ATI discrete graphics card) and 17.7 million VND without tax (with discrete graphics card).

IdeaPad Y460 general configuration: Intel Core i3 Processor 350M processor (2.26GHz / 1066MHz / 3MB L3 cache); 14.0 "screen 16: 9 HD, 1366x768 pixels WXGA, LED; 2 GB DDR3 memory; Intel Graphics Media Accelerate HD video card or select ATI Mobility Radeon HD 5650 w / 1G DDR3; Hard drive from 320 GB to 500 GB, Wi-Fi Intel 100 BGN, Camera 1.3 megapixel, 6 cell battery, Other utilities: DVD, USB, 6-in-1 card reader, Ambient Light Sensor, JBL speakers, 2.0 Dolby, VeriFace technology, OneKey Rescue System ., PC-DOS operating system Warranty: 1 year (can be upgraded)
