

Lenovo Ultrabook transforms into tablets

In the past week we received Lenovo's ThinkPad Helix ultrabook. Introduced in CES 2013 event but now sold.

In the past week we received Lenovo's ThinkPad Helix ultrabook. Introduced in CES 2013 event but now sold.

ThinkPad Helix Ultrabook running **Windows 8** operating system is a convertible model, which can be converted into a tablet when removing the keyboard. It runs Windows 8 full version, but is twice as powerful as a Windows 8 tablet.

IPS screen 11.6 inch resolution of 1920x1080p Full HD standard. Core i5 processor (3427U), DDR3 4-8GB RAM. 256 GB SSD hard drive. Full Windows 8 operating system with touch pen support. The front and rear cameras all have 1080p resolution.

With the above configuration parameters, the machine costs **1,679 USD**. If you replace with Core i7 processor and 8GB of RAM, the machine costs \$ **2,000**.

In tablet form, ThinkPad Helix batteries allow **6 hours of use** . If adding a keyboard, the battery can be used for **4 to 10 hours**.

Machine with NFC connection, 2 USB ports, Display port for the second monitor and SD card slot.

ThinkPad Helix when in the form of ultrabook and when disassembling the keyboard into a tablet
