

Lenovo unveiled the first Core i7 laptop in Vietnam

The Lenovo Y550P uses the latest Intel Core i7-72QM processor with 1.6GHz, 1333MHz and 6 MB L2 cache.

The Lenovo Y550P uses the latest Intel Core i7-72QM processor with 1.6GHz, 1333MHz and 6 MB L2 cache. It can be said that this is the hottest "processor" on the technology market in 2009 and is the perfect integration for a versatile entertainment machine .

Lenovo IdeaPad Y550P uses Core i7

Y550P is also equipped with Intel's Hyper-Threading Technology, which allows 8 data streams to be processed simultaneously. Help for modern i7 processor is 4GB DDR3 memory and NVIDIA GeForce GT 240M graphics card 1GB memory. Thus, the Y550P has a fast execution speed and produces beautiful images. The device is integrated with a high graphics card.

Multimedia features on the Y550P are also fully integrated. The 1.3 Megapixel webcam at the edge of the screen not only helps you chat online more conveniently, but also has a very important task, which helps you log in to the device. Smart VeriFace technology on the Y550P allows you to keep your security safe and convenient thanks to the face image login method.

The Lenovo Y550P is also equipped with a comprehensive sound system based on Dolby's Home-Theater technology. The device is equipped with a "2.1 speaker system" with 2 2W stereo speakers in the upper corner of the keyboard and a subwoofer (super bass) on the bottom.

One point that cannot be mentioned in the Y550P is Lenovo's smart management software. OneKey function is a bright spot when helping you manage and protect your computer conveniently according to 3-in-1 technology: virus scanning, system maintenance and data recovery. The OneKey can work both inside and outside the operating system, helping you avoid "dilemma" when the operating system crashes. Lenovo Desktop Navigator incorporates a series of touch-sensitive keys to help you manage and "quickly call" frequently used applications.

Desktop Navigator

The Y550P also has an upper sensor array and 5 extra 2 side buttons

Besides the main keyboard, the Y550P also has an upper touch panel and 5 extra 2 side buttons. The Y550P keyboard has a good bounce, creating a pleasant feeling when writing text. Below, multi-touch support touchpad

brings many new feelings for users. You can rotate your finger to move the web page or drag 2 fingers to style - zoom out the image.

The connection ports are divided evenly around the Y550P body

The connection ports are divided evenly around the Y550P body. In front is the Wi-Fi toggle button, card reader slot, audio jack. The Lenovo Y550P has 3 USB, E-sata, expansion slots, WLAN, VGA, RJ45, HDMI, antenna input and Blu-ray combo optical drive. It also comes with a small type antenna and controller.

With antenna input allows you to watch TV with the Y550P wherever you are.

Lenovo Y550P is currently sold in Vietnam for a reference price of about 1,899 USD (excluding VAT) with a 1-year warranty period.
