

Lenovo V470 Core i3 chip costs nearly 12 million VND

This is an upgraded version of Lenovo V470c laptop launched last year. The new version uses Core i3 chip, 2GB RAM and 500MB hard drive.

This is an upgraded version of Lenovo V470c laptop launched last year. The new version uses Core i3 chip, 2GB RAM and 500MB hard drive.

The V470 has a high-end configuration with a second-generation Core i7 processor, 8GB of DDR3 RAM and a 1TB hard drive.

Powerful and effective are the salient features of the Lenovo V470. This laptop has a basic configuration of Core i3-2350 chip, 2GB RAM, 500GB hard drive, but users can choose more advanced version, with processor up to Intel Core i7 second generation, RAM up to 8GB DDR3 and optional 1TB hard drive.

It has a 14-inch HD screen with a resolution of 1,366 x 768 pixels, along with NVIDIA GeForce 525M 2GB discrete graphics card, providing moments of relaxing movies. Switchable Screen Mode (Switchable Graphic Mode) built-in will help to switch between the highest operating modes or save battery depending on the intended use.

Besides, with Lenovo's standard wireless BGN feature, Lenovo V470 users will easily connect to the network for work and entertainment. Users can also conveniently communicate with customers and friends thanks to the built-in video conversation applications and a built-in 2-megapixel HD Megapixel web camera (can support

resolution images). to 720p).

14-inch HD screen, resolution of 1366 x 768 pixels.

Like many other Lenovo models, the V470 is optimized for performance by having Lenovo Enhanced Experience 2.0 software for Windows 7 combined with RapidBoot technology, allowing users to boot up faster. 20 seconds compared to machines that only have Windows 7, and help get the best multimedia experience possible.

The basic configuration version is priced at VND 11,890,000 (VAT included).
