

Lenovo Vietnam launched a new model for entrepreneurs

On July 9, Lenovo introduced in Vietnam the new ThinkPad T400s laptop for business people

On July 9, Lenovo introduced in the Vietnamese market the new ThinkPad T400s laptop for business people, which is designed more firmly but still ensures the 'super thin, super light' element. In addition to the new design, the ThinkPad T400s' performance has also been significantly improved by equipping many 'special-use' technologies.

Many times Vietnam has become the introduction point of the first technology products of famous brands in the world, and this time too. In Southeast Asia, the ThinkPad T400s was first introduced in Vietnam, then to other countries like Singapore, Thailand .

Much of the ThinkPad T400s design is inspired by Lenovo's thinnest and lightest laptop, now the Thinkpad X300. The ThinkPad T400s's thinness is only about 2.1cm, and super light with a weight less than 1.8kg. Thanks to these features, the main users of the ThinkPad T400s are business people who often have to travel.

For business people.

In addition to the 'ultra-thin, ultra-light' feature, the ThinkPad T400s is also equipped with a 14.1-inch LED technology screen, solid state drive (SSD) and a metal frame that protects the machine against impact. Very good force. According to Lenovo, the carbon fiber used for the ThinkPad T400s chassis is a material in aircraft manufacturing. Thanks to its flexible carbon fiber, the ThinkPad T400s weighs 20% less than the ThinkPad T400 'predecessor'.

According to Nguyen Van Thien, CEO of Lenovo Vietnam, the ThinkPad T400s is a combination of ultra-thin, ultra-light, performance and flexibility. This is a typical product for dynamic entrepreneurs with strong performance but still ensuring mobility and data security. According to Thien, the ThinkPad T400s is a product typical of Lenovo's business strategy, which is to enhance the user experience and focus on the most advanced technologies.

Improve the user experience.

The basic configuration of the ThinkPad T400s is announced by Lenovo Vietnam: Intel Core 2 Duo 2.53GHz processor (energy saving chip); 14.1-inch LED screen, 128GB SSD drive or 250GB hard drive; integrated graphics; DVD burner or Blu-ray drive; Ethernet, Wi-Fi and Wimax (optional), WWAN, Bluetooth, and ultra-broadband connectivity.

Multi-touch touchpad.

The ThinkPad T400s also supports Lenovo's ConstantConnect and Protect technology, allowing users to optimize their BlackBerry smartphones with laptops. In addition, the laptop also supports 2 separate screens; fingerprint recognition; integrated eSATA port; webcam; VoIP; Multi-touch touchpad and battery (6-cell) can run continuously for 6 hours. On this occasion, Lenovo announced plans to equip multi-touch screens in the upcoming ThinkPad T400s versions.

Starting price is 1,599USD.

Currently the ThinkPad T400s is being offered through Lenovo's business partner system, with a starting price of \$ 1,599.
