The outstanding advantage of this screen is the better visibility of the bright outdoor. But in fact X200T is also the "copy" of the ThinkPad T400s, which has a slim, compact design that has been very successful since its launch in June this year. Therefore, X200T can be considered a hybrid model with the mainstream design of ThinkPad T400s laptop and touch screen rotation of tablet X200.

Currently the new X200T is sold in the US market for \$ 1,654, about VND 30 million. Also in Asia, Lenovo said it will wait until October 22 until Windows is officially released to introduce the new X200T capacitive touch screen tablet.
