

Lenovo's 2-screen laptop

In two weeks, the Chinese computer maker will announce the ThinkPad W700ds system equipped with a 10.6-inch small screen in addition to a standard 17-inch display.

In two weeks, the Chinese computer maker will announce the ThinkPad W700ds system equipped with a 10.6-inch small screen in addition to a standard 17-inch display.

The information on the IBM website confirms that the W700ds weighs up to 4.9 kg due to the small screen, designed primarily for photographers, graphic design professionals and application developers, which has accounted for 0 , 9 kg.

Users can choose between Intel Core 2 Quad Core or Core 2 Dual Core processors. The ThinkPad W700ds will be introduced in CES consumer electronics exhibition that will take place early next month in Las Vegas (USA).
