

Lenovo's laptop running Android rotating screen appears

IdeaPad A10 comes with a design similar to the Yoga line but runs an operating system that is only for tablets or smartphones.

IdeaPad A10 comes with a design similar to the Yoga line but runs an operating system that is only for tablets or smartphones.

Lilputing sources initially confirmed that the machine can fold the 360-degree screen with laptop and tablet modes. However, the leaked images do not show that the mode works like a tablet similar to its Yoga model. IdeaPad A10 is said to use quad-core Rockchip RK3188 core ARM Cortex-A9.

It has a 10.1-inch screen with a resolution of 1,366x768 pixels, 1 or 2 GB RAM, 16/32 GB internal memory, integrated 2 USB 2.0 ports, microUSB, microSD, HDMI card slot. 0.3 megapixel front camera and 22.6 Whr battery capacity.

No information about the official launch time of the device.

Some images are supposed to be Lenovo IdeaPad A10:

Similar keyboard design Thinkpad line.

The design folds to the back but the image shows that it is difficult to rotate the 360 ??degree angle.

A10 looks like a regular laptop.

USB connection on the side.

Customizable interface.
