

Lenovo's latest IdeaPad collection

The three U150, U550 and Y550P products focus on mobility, multitasking, fashion design and the latest multimedia features.

The three U150, U550 and Y550P products focus on mobility, multitasking, fashion design and the latest multimedia features.

IdeaPad Y550P is considered an ideal laptop for multi-tasking and one of the strongest laptops in Lenovo's consumer product portfolio. This is the company's first laptop to use an Intel Core i7 processor with Turbo Boost technology that automatically speeds up the chip when the computer needs more performance.

The laptop also incorporates Nvidia's powerful graphics technology, high-definition 15.6-inch HD high-definition display, Dolby Home Theater surround sound and especially SlideNav - a unique touch toolbar above the table. keys, making moving between applications much faster and more convenient. Battery about 4.5 hours.

Ultra-thin Laptop **IdeaPad U150** is only 13.5 mm thick and weighs 1.35 kg. This compact and light-weight 2-color computer uses Intel CULV power-saving chips, DDR3 memory of up to 8 GB, wide 11.6-inch HD screen and up to 7 hours of battery life. In particular, the Active Protection system on the U150 can protect the hard drive when the laptop falls or vibrates.

The new version 7.0 of OneKey Rescue will allow data recovery twice as fast as before, plus a more powerful virus scanning feature, even before the operating system has finished booting.

IdeaPad U550 is 24 mm thick, has a 15.6-inch HD widescreen, and uses a Core 2 Duo chip. It is designed to facilitate the need for flexible use both at home and at work. For example, flexible conversion graphics technology will allow users to turn on / off the graphics card with a single button to extend battery life. Dolby Sound Room stereo sound through the built-in loudspeaker system adds an impressive, honest touch to presentations, game play or movie watching.

The Ambient Light Sensor system on the U550 will automatically adjust the screen brightness according to the surrounding environment, limiting users' eye strain. This laptop also has a DVD drive, fingerprint reader and VeriFace face recognition software.
