

# Lesson 26: Toast in Bootstrap 5

Toast is also a fun component, similar to notifications on websites and apps. Here's how to create a toast in Bootstrap 5.

Toast is also a fun component, similar to notifications on websites and apps. Here's **how to create a toast in Bootstrap 5**.

## What is toast on the web?

A toast is a component similar to an alert box, but it only appears for a few seconds when something happens. For example, when a user clicks a button, submits a form, etc.

## How to create a toast in Bootstrap 5

To create a toast, use the class and `.toast` add it inside `.toast-header .toast-body`

Note: The toast is hidden by default. Use the class `.show` if you want to show it. To close it, use the element `▢` and add `data-bs-dismiss="toast"`:

```
Toast Header ▢ Some text inside the toast body
```

For example:

```

```

### Example of toast on TipsMake.com.com

Toast is like a quick notification box, appearing for only a few seconds when a particular task occurs.

This example uses `.show` to default to always displaying the toast. Close it by clicking the x in the toast header.

The leading technology news channel in Vietnam.

## Ví dụ về toast trên Quantrimang.com

Toast giống như một box thông báo nhanh, chỉ hiện trong vài giây khi tác vụ nào đó xảy ra.

Ví dụ này dùng `.show` để mặc định luôn hiện toast. Đóng nó bằng cách click vào dấu x trong header toast.

## Open a toast

To display a quick toast alert with a single button click, you must launch it using JavaScript: select the specified element and call the `toast()` method .

The following code will display all toasts in the document when you click a button:

For example:

Bootstrap Example

## Examples of toast

This example uses a button to display the toast.
