

Let's admire inside the world's most luxurious aircraft

Surely one of us has a dream that someday, there will be a magnificent trip on a luxurious flight, right? Invite you to watch a circle around this luxury apartment apartment!

Surely one of us has a dream that someday, there will be a magnificent trip on a luxurious flight, right? Now, if there is enough money, that dream can become a reality. **Etihad Airways** has developed this field to a new level, to bring the most luxurious experiences for travelers. They created one of the **A380** aircraft that was described as a luxury apartment. On the **Bright Side** page, we hope one day we all have the opportunity to experience this special service. Invite you to watch a circle around this "luxury apartment"!

About a year ago, the company changed a bit of paint used on aircraft. The first aircraft painted with new paint is one of the A380 aircraft of Etihad (*the leading airline of the United Arab Emirates*). Instead of the flag and the national emblem of the emirate, the tail of the plane is decorated with triangles that look quite fancy.

The Airbus 380 has two floors with 4 types of seats: economy class, business class, first class and "residence" class. The final rank is located on the upper floor of the aircraft.

This seat is suitable for groups of 2 people, located on the right side of the staircase. With an area of 12 square meters, there are 3 rooms: 1 living room (with double area including dinner space and mini cinema), 1 bedroom, 1 bathroom with shower and toilet. Besides, the passengers will be served and cared for by trained staff at Savoy Hotel in London.

The flight from Abu Dhabi to London is priced at around 77,000 AED (money unit of the emirate of Saudi Arabia) equivalent to 21,000 USD. All types of tickets are sold almost one year in advance.

The bedroom has a large double bed.

First class compartment has a " *simpler* " part with an area of ??about 5 square meters. Fares for trips from Abu Dhabi to London are around 31,000 AED to 36,000 AED (\$ 8,400 to \$ 9,800).

In this compartment, the room separator can slide near the cabin window to allow passengers to talk to the person nearby. However, passengers can also slide them back to avoid any misunderstandings that may occur.

This is a bathroom of brick-lined first-class chairs and marble washbasins.

This is the cabin for business class. Each passenger will have a private space and the seat can turn into a bed with a light push of a button.

Each passenger is provided with a pair of socks, earplugs, toothbrushes, combs, all for free, along with some high quality travel accessories.

On the upper deck of the plane, there is also a mini bar with comfortable sofas for passengers with business class tickets.

Downstairs is a compartment for universal ticket passengers. This cabin passenger is provided with cushions and pillows to help them experience a more comfortable flight.

The common ticket area is located next to the emergency exit.

Meals for children.

Cabin of pilots.

In addition, there is a room reserved for the crew behind the pilot's cabin for easy rest. This room consists of a single bed and a chair, suitable for pilots and members to rest comfortably.

Wish you have a great trip!
