According to *Notebookcheck*, the Korean manufacturer has just added two new Xnote laptop models. These two products are codenamed N450 and N550.

Xnote N450 and N550 are equipped with the latest Ivy Bridge chip from Intel. (*Photo: Notebookcheck*).

The Xnote N450 and N550 have screen sizes of 14 and 15.6 inches respectively. The screens of these two models have a resolution of 1,366 x 768 pixels and 1,600 x 900 pixels respectively. LG products are equipped with the processor Core i5 or i7 based on the latest Ivy Bridge platform of Intel. Meanwhile, AMD Radeon HD 7650M graphics card comes with Xnote N450 and N550 with 1GB or 2GB VRAM.

In addition, LG's new laptop is also equipped with 8GB DDR3 memory, 500GB hard drive and support SRS surround sound technology. Both machines have webcams, Ethernet ports, HDMI, memory card readers and Wi-Fi connectivity. The manufacturer said that the Xnote N550 is preinstalled with software that converts 2D images and videos into 3D.

Currently, the selling price of the product has not been announced.
