

LG out 15.6 inch ultrabook with optical drive

Product named U560 runs on Windows 8 operating system, uses Core i5 chip and uses IPS technology screen.

Product named U560 runs on Windows 8 operating system, uses Core i5 chip and uses IPS technology screen.

LG U560 is currently only sold in Korea.

LG's new Ultrabook weighs 1.95 kg and is 20.9 mm thick. The device is equipped with 15.6-inch IPS screen, Ivy Bridge Core i5-3337U chip with 1.8 GHz speed, discrete graphics Nvidia GeForce and both regular hard drives and SSD. The product supports connections such as USB, HDMI, LAN and runs on 64-bit Windows 8 operating system.

However, LG U560 is currently only sold in Korea. Information such as selling price as well as release date in other markets has not been announced by LG.
