

## LG presents the 3D laptop near full-HD screen

Following Acer, Asus, HP and Toshiba, LG will be the 5th computer maker to launch a 3D laptop with a close-up screen with full-HD resolution.

**Following Acer, Asus, HP and Toshiba, LG will be the 5th computer maker to launch a 3D laptop with a close-up screen with full-HD resolution.**

LG Xnote A510 will be sold with 2 pairs of polarized glasses.

LG Xnote A510 is equipped with a 15.6-inch LED-backlit 3D screen. With a resolution of 1,366 x 768 - near full-HD quality (1,920 x 970-980 pixels), the Xnote A510 will be the 3D laptop with the sharpest screen.

Xnote A510 runs Core i7 840QM or Core i7-740QM processor. It comes with 1GB Nvidia GeForce GT 425M graphics card and users will need to wear specialized glasses to view 3D content. However, LG designed the eyeglasses quite eye-catching.

Laptops will be preinstalled with TriDef software to convert 2D content to 3D. LG Xnote will also be equipped with SRS TruSurround HD audio technology. It has an HDMI 1.4 jack, Blu-ray drive and fingerprint reader.
