

LG V50 ThinQ: Unique 5G Smartphone capable of attaching a second sub-screen

At MWC 2019, first Samsung and Huawei have launched folding screen smartphones that impress the technology world. And to answer the Mate X, Galaxy Fold, LG also brought this event a special smartphone of the company is V50.

At MWC 2019, first Samsung and Huawei have launched folding screen smartphones that impress the technology world. And to answer the Mate X, Galaxy Fold, LG also brought this event a special smartphone of the company is V50.

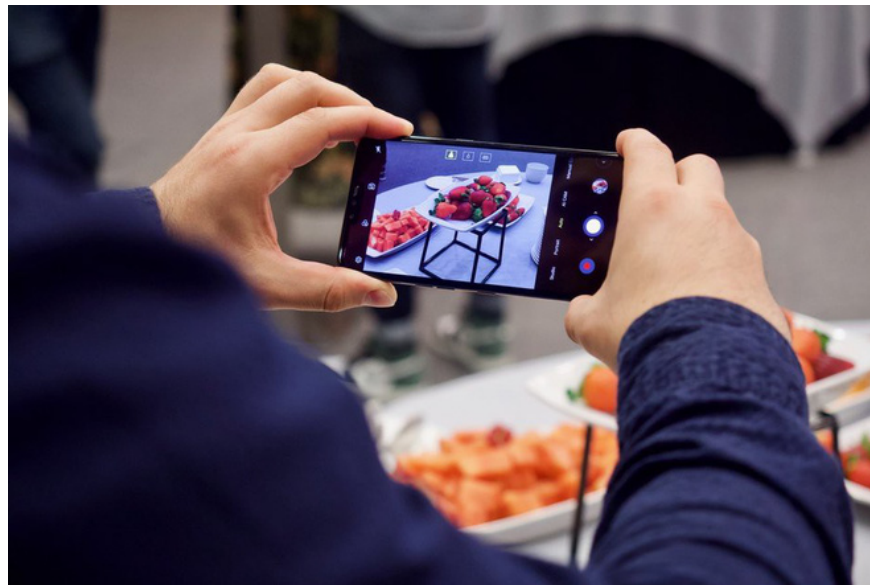

The V50 smartphone is equipped with 6.4-inch OLED screen with QHD + resolution, with rabbit ears. 8MP + 5MP selfie dual camera system with a wide-angle lens makes LG V50's rabbit ears bigger.

Cluster of 3 rear cameras with 12MP + 12MP + 16MP resolution is horizontal, the camera sensor is integrated into the inside of the camera so it is not protruding to make the back side more perfect.

The V50 still uses a familiar fingerprint sensor. It is equipped with IP68 waterproof capability and MIL-STD 810G standard of the US military, so it has high durability, good impact resistance.

LG V50 is equipped with Snapdragon 855 processor, 6GB RAM, 128 GB of storage, 4,000 mAh battery capacity, especially support 5G network connection immediately after being sold. At the same time, it is also equipped with a new Vapor Chamber cooling system to help the 5G modem not overheat when operating.

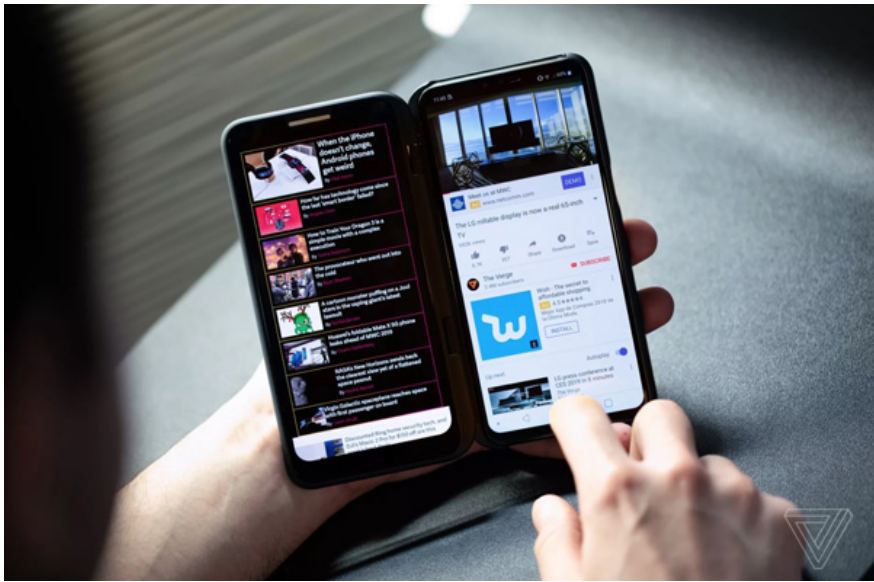

LG still uses a 3.5mm headphone plug, which supports fast charging Quick Charge 3.0 on V50. Especially, thanks to the Boombox Speaker external speaker, the V50 will bring Hi-Fi sound quality.

One of the most impressive features of the V50 is the case of the device that can attach a second monitor. The two V50 screens can open the same application to extend the display or open two separate applications.

Currently, LG has not disclosed the price as well as the official launch date of V50.
