

# Lien Quan Mobile: Tips to use Florentino to climb rank quickly

Florentino is one of the hottest generals in Lien Quan Mobile with a virtual skill set and requires extremely high skills from players.

In Mobile Alliance, Florentino is a warrior general and assassin in the position of the evil god or jungle. This is one of the names that requires a very high skill level of gamers and can weigh almost any skill exchange thanks to its skill set. During the laning phase, gamers should take advantage of Floretino's mobility to trade safely with Flower Rewards whenever given the opportunity.

Right from the first level, Florentino's Flower Bonus move has allowed this general to exchange extremely good moves with a very simple combo of picking flowers - basic attacks and then repeats continuously. This is a simple but extremely annoying combo sequence when the enemy intends to approach soldiers to farm. When you reach level 2, this combo will become stronger with a huge amount of damage because there is an additional skill 2 - Hao Hoa mixed in between picking flowers and normal attacks.

In terms of equipment, Florentino needs items that increase physical ATK such as Shangchuan Phase, Complex Sword, and then defensive equipment such as Mantle of God Ra and Armor and Troy Medal. Meanwhile, the right summoner spell for Florentino will be Express to give a large increase in movement speed to fly the target kite. In addition to Flash, players can take advantage of a number of other spells to create mutations in combat.
