The update brings Adobe Lightroom CC to the App Store, and provides simpler downloads for users who already have an Apple ID. With this move, you will have 2 methods to get down to Lightroom CC software: The first is to download directly from Adobe, and the second is through the App Store. However, for Mac users, the second option seems to help save time because many people may already have data and information stored from previous downloads, skipping quite well. many cumbersome steps.

One point to note is that the version brought to Mac App Store will be Adobe Lightroom CC, not the old Lightroom Classic but more powerful. The Adobe Lightroom Plan subscription package will include Lightroom CC and 1TB of cloud storage for about \$ 10 a month. Photographers, photo editors want to use both Lightroom CC and Photoshop, or prefer Lightroom Classic, can still download Photography Plan, including 3 programs (with 20GB of storage instead of 1TB), with the same price through Adobe.
