What's new in Adobe Photoshop CC 2020?

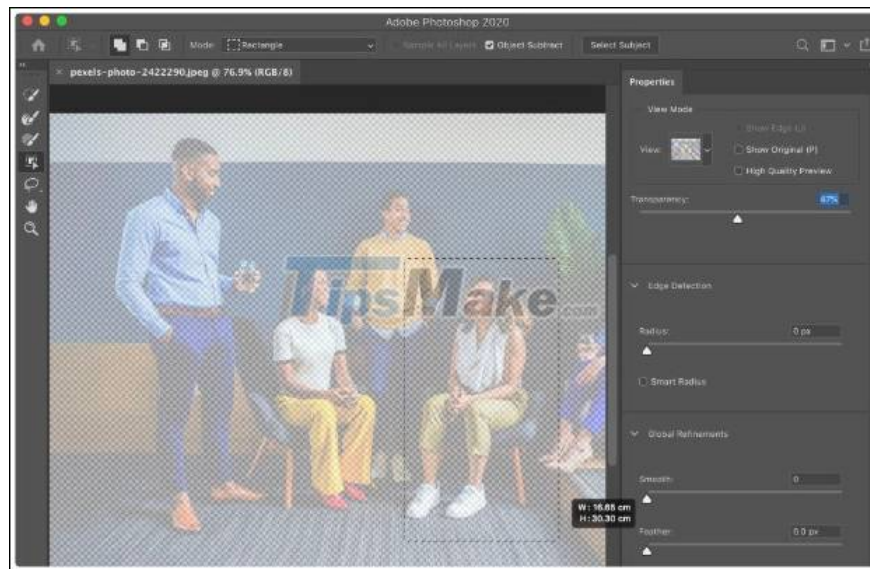

1. Improved Select Subject feature

With Photoshop CC 2020, the Select Subject feature, based on Adobe's Sensei AI platform, is significantly improved. Select Subject will analyze the image and automatically select the subject in the photo you want with just a few mouse clicks.

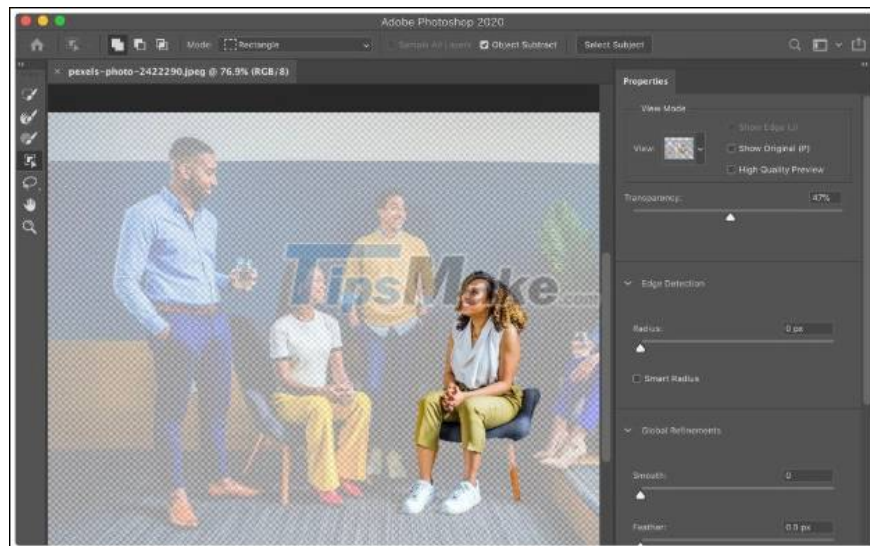

2. Quick separation of subjects

The Select and Mask dialog box (formerly known as Refine Edge) is integrated with a new Quick Selection tool, allowing users to select objects extremely quickly and accurately.

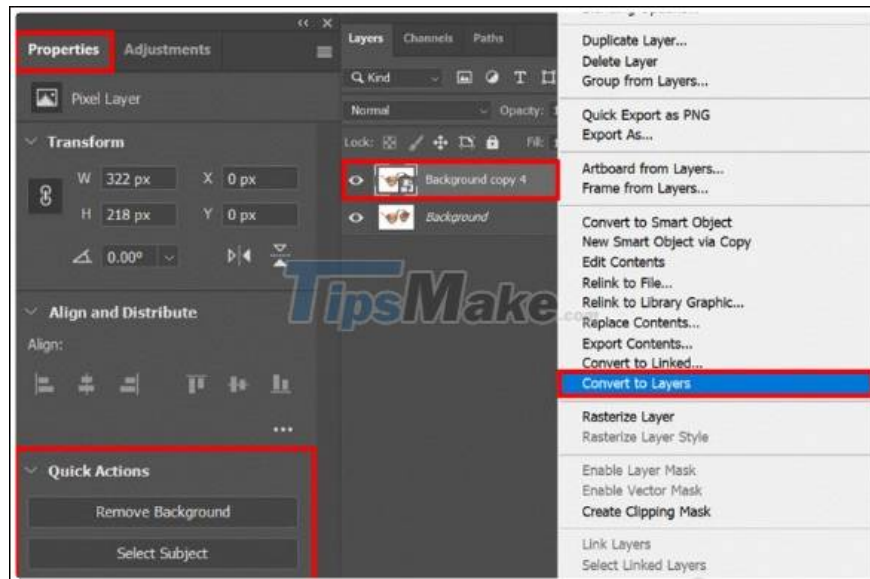

Once you have selected an object, Photoshop will automatically isolate it.

3. Select the object and delete the background

With the new Photoshop CC update, the Properties window is added with two new useful features, users can use the Rectangle area or Lasso tool to select objects and objects. Photoshop will analyze and select that object.

Object selection tool is used as Quick Mask. To remove the background, all you need to do is click on the Delete background option and the background will be automatically removed from the image.

4. Content-Aware Fill feature

Content-Aware Fill is also one of the AI-based features. On the Photoshop CC 2020 update, the Content-Aware Fill feature has been significantly improved.

In which the Sampling Area Options feature allows the user to select the unwanted points and parts to delete from the photos. Also from now on users have access to the following options:

Automatic: Photoshop automatically determines the parts to be filled based on color and texture.

Custom: User can select parts using Brush tool.

5. Zoom in on the selected layer

To enlarge a layer, just click on the layer you want to enlarge, while pressing and holding Alt.

6. The Presets panel has been updated

In the new version of Photoshop, the Presets panel is split into a separate panel. To apply a preset (roughly defined as pre-tuned image parameters), simply drag it into the image preview window.

7. Use the "-" key as the Eraser tool

If before, to erase a point or something, we have to go to the Eraser tool or click E. Now to delete something drawn with the Brush tool, we just need to press the "-" key. to delete.

8. Close other tabs

Previously, if we opened and worked with many different images, we would have to manually close each tab one by one, invisible, this would take a lot of time and effort. With Photoshop CC 2020, simply right-click on the working image and choose Close others to close the other image tabs.

9. Cloud Libraries

Finally, Photoshop 2020 update adds a new cloud library, allowing users to sync and optimize operations performed on desktop and mobile applications, including Photoshop, XD, Fresco and Aero applications.

Although the cloud library is stored separately, independent of Creative Cloud files, it still takes up space.

10. Other features

In addition to the above features and improvements, the Photoshop CC 2020 update also includes a number of other small improvements including: updating Warp and Transformation tools, saving photos as GIFs by visiting File => Save, .
