Skype is software that allows chats to take place around the world. You can use Skype on whatever device works best - mobile phone, computer or tablet.

Skype for Windows brings Skype's excellent video chat software to your desktop with a sleek, modern user interface.

With Skype for Windows, you can video chat, text, and send instant messages to friends right from your Windows desktop. You can connect for free to any device or PC with Skype installed, or you can call cell phones and landlines if you have Skype credit.

Skype Features

Video calling, instant messaging, etc.

There are a lot of things you love about Skype, most notably the ability to make audio and video calls, text and instant messaging friends.

When you sign in to Skype with your Microsoft account, it automatically imports your contact list into your address book so you're ready to go. Then connect with someone easily by clicking on a contact and choosing whether you want to video chat, audio call or instant message them.

Call and video quality on Skype is generally excellent, although that depends a lot on your Internet connection. With good connection at both ends, calls will be loud and clear. The video starts off quickly - although sometimes you may experience some hanging frames and slow loading videos. Skype also supports free group calling and screen sharing for up to 10 people - a feature previously only available to premium users.

Well organized, streamlined interface

The interface may look a bit blank compared to older versions of Skype but Microsoft has streamlined things with a more organized interface, making all the features easily accessible. Your recent calls, favorites, and contacts are all available on the home screen, and you can change your Skype status in the top right.

Skype also includes a lot of fun, animated emojis that are sure to delight emoji lovers.

Skype is still a great app for keeping in touch

Skype has gone through many changes but overall, the app still offers a great video chat and messaging experience for users.

Advantages

1. Supports video chat, texting and instant messaging
2. High quality video chat
3. Automatically import contacts from Microsoft account
4. Lots of emoticons
5. Free group video call and screen sharing

Defect

1. The interface looks a bit sparse
2. Contacts may need editing after importing
