What is Free PDF to Word Converter?

FM-PDF.com is a leading solution provider for creating, reading, converting and organizing PDF files, Word documents and images. Customers choose FM Software Studio products because they are fast, affordable, secure and easy to use. One of them is Free PDF to Word Converter.

Free PDF to Word Converter is a free cloud-based application that allows you to convert PDF files into Microsoft Word files.

You can't edit PDFs unless you take the time to copy text and paste into an editable document. Usually you will lose all of the original formatting. This app saves you time and keeps your original layout intact.

Free PDF to Word Converter is a free cloud-based application

Advantages of converting PDF to Word

Having a direct PDF to Word converter is a time-saving option compared to the tedious copy and paste needed to edit PDF files. The goal of a PDF file is to keep the format and page layout correct for viewing on any device. PDF is not for editing. But, what if you need to edit a PDF file?

Features of Free PDF to Word Converter

Editing is easy

Instead of losing the original formatting and page layout by copying and pasting the content, you can use a converter. This PDF converter will collect the information in the PDF document and translate it into Word DOC format. It keeps the page layout at its best.

Occasionally, you will see slight differences in the presentation of the document. Rarely, you will lose a piece of information because the converter cannot translate it. Usually all the content is there but with a different look. This program is good at keeping the page layout close to that of the original page.

Choose a page range

What if you don't need the entire document? This free converter solves that problem. You can select the pages you need to convert and have the software convert those pages from PDF documents to a separate DOC file. This feature is useful if you need accurate information from long PDF documents.

Let's say you're writing your thesis and need a quote from an author's ebook. Rewriting words correctly is a waste of time. You don't have disk space to convert whole e-books. So what can you do? Convert a single page with the paragraph you need. Then copy and paste the snippet. That is a much more practical solution.

Picture or no image?

Since PDF files keep the correct page layout, they usually come with several images. If you don't need an image, you can choose the option to skip image conversion. If you want some images but not all, you will have to convert all of them and then remove the ones you don't need. No selective image conversions.

Images are displayed as part of the page when converted to Word. If you want them as separate JPEG files, you can paste the images on a blank canvas in Paint.NET or Adobe Photoshop. The image may be of a loss of quality, but this PDF converter does not have an option to convert the PDF to an image format.

One file at a time

The free version of FM PDF to Word Converter does not support batch PDF conversion. You will need to upload and convert each PDF file into a Word Doc file. This process requires more user input, but the conversion is fast. It can be time consuming if you need to convert a large number of PDF files.

The Pro version of this software supports batch PDF conversion. With a one-time payment, the Pro version offers more options on a more complex platform. To try another cloud-based application, refer to PDF to Word Converter for Windows. To convert Word files to PDF, try the free trial version of Word to PDF Converter.

A small, free PDF to Word converter

Since FM Free PDF to Word Converter for Windows and Mac PCs is cloud-based, it doesn't take up a lot of space. Convert quickly and reliably to keep the original PDF format. You can select a page or pages to convert, with or without images. The platform is intuitive and easy to use.

Advantages

1. Convert PDF to DOC quickly
2. Compact cloud-based application
3. Allows you to choose the range of pages
4. Convert with or without images
5. Easy-to-use platform

Defect

1. There is no option to batch convert PDF files
2. Application sponsored by advertising and donations
3. One-way conversion
