

List and when Xiaomi devices will be upgraded to MIUI 11

The new MIUI version adds some attractive features and has a nicer design.

MIUI 11 interface has just been officially launched by Xiaomi during its new product launch event yesterday (September 24). The new MIUI version adds some attractive features and has a nicer design.

MIUI 11 interface is added with the new Mi Lan Pro system font, system-wide dark mode and improved Always On Display function. New animations, wallpapers, themes and notification system have also been improved. In addition, the icons on the MIUI 11 interface have also been improved with a softer design.

The sound experience in MIUI 11 is enhanced with entirely new effects and alarms.

The new Mi Go Travel tool allows users to book tickets for a wide range of transportation from buses, trains to airplanes with currency conversion and super battery saving mode.

MIUI 11 comes with the Mi Work tool built into the WPS office applications.

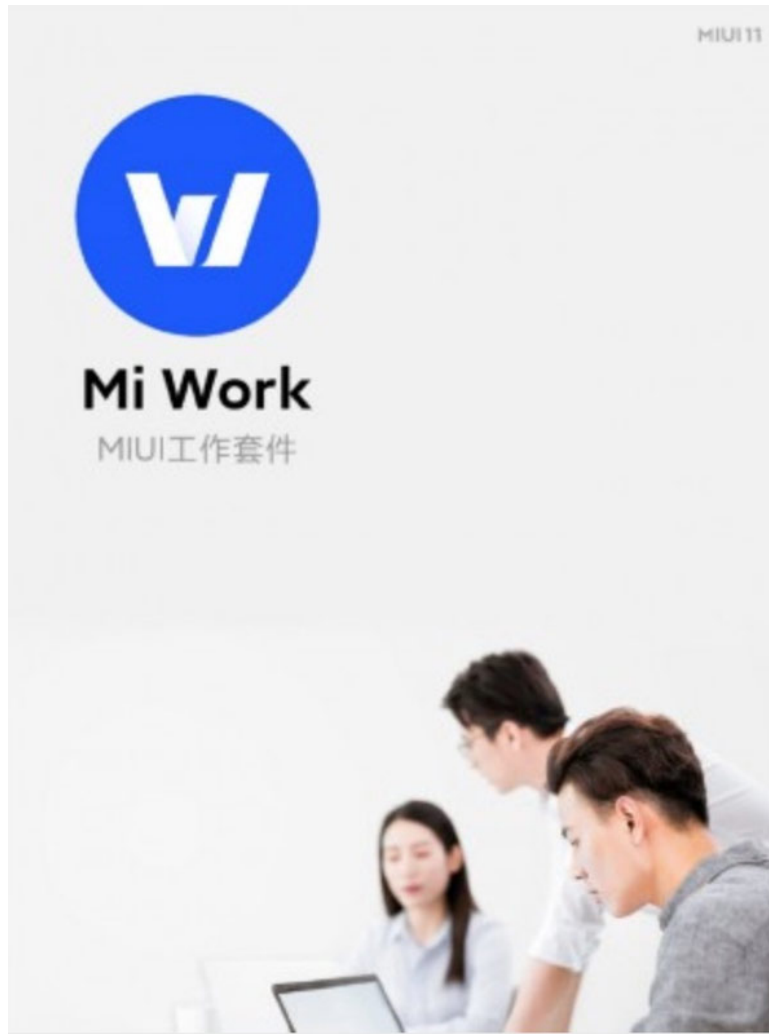

The Family Guard tool allows you to set up time limits on app usage and track live location of family members.
