

List of champions buffed and nerfed in League of Legends 9.22

This is a list of champions buffed and nerfed in League of Legends 9.22, with a list of nerfed champions more than buffed champions.

Although Riot Games 2019 is in progress, Riot Games keeps updating buffs and nerfs of champions in the next updates for gamers. And in this version of League of Legends 9.22, Riot Games surprised when looking at the heroes who are quite strong at Worlds 2019 such as Kayle, Xayah, Pantheon, Kayle and some other generals.

The first information about the 9.22 League of Legends update was also announced by League of Legends game leader Riot Mark Yetter on his personal Twitter.

9.22 Patch preview. Should be pretty light touch on all of these changes, last patch before preseason. Changelists coming tomorrow.

9.22	
Nerfs	Buffs
Kayle	Sejuani
Pantheon	Sylas
Kai'sa	Kalista
Xayah	
Ashe	
Blitzcrank	
Nautilus	
AP Malphite	

The reason Pantheon is on this list is because this is the highest ban in the Worlds 2019 and also a champion with a strong solo lane. Kayle though nothing outstanding at the beginning of the match, but later on, the more cumbersome when alone can fan the enemy team.

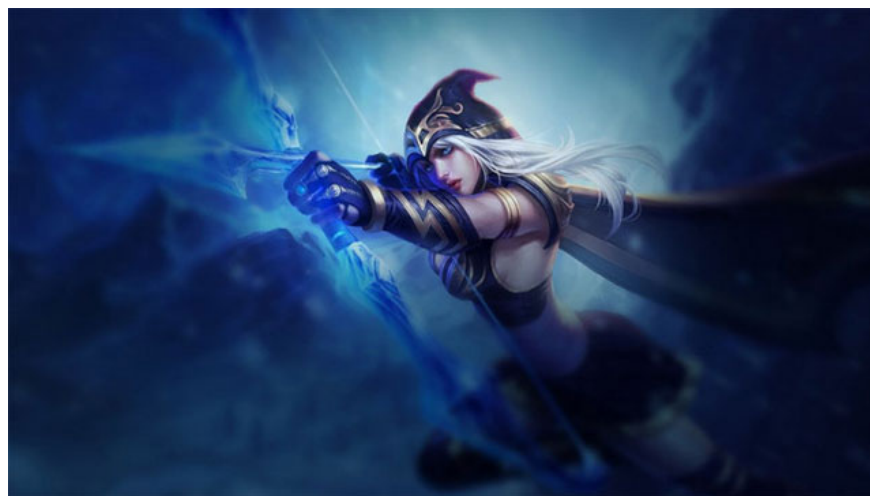

With two girls Kai'Sa and Xayah, these are the gunners considered to be superior to the other gunner generals. With certain advantages, Kai'Sa and Xayah are always selected by professional teams to use. There are many opinions of gamers that, besides Kai'Sa, there are not any champions that can compete with Xayah.

Also in this version, the 2 Supporting too much like Blitzcrank or Nautilus are quickly nerfed by their previous big buffs.

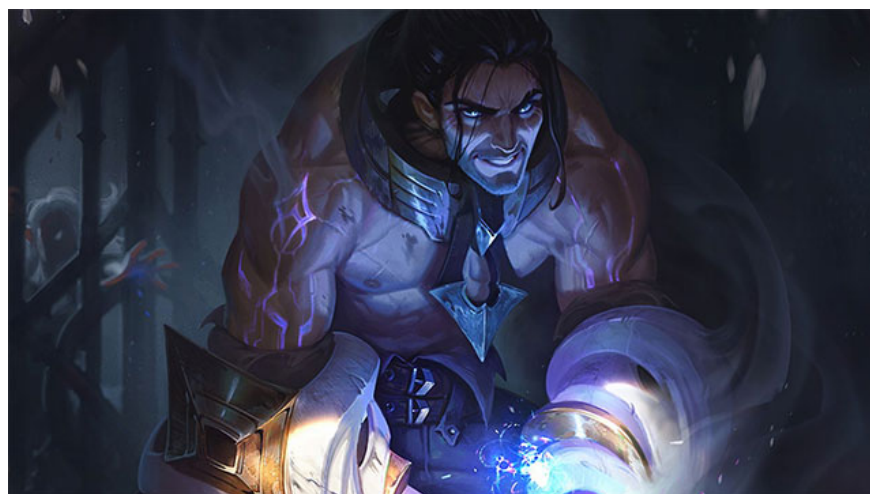

Ashe and Malphite are currently very strong in the solo queue, especially on the high rank with the ability to open fights from afar and fly kites even though she is not highly mobile.

She has also been continually buffed all this time. At level 6, Ashe can create a mutation with a stun skill from a distance. And from there becoming a gunner extremely strong road that hardly anyone can keep up.

Malphite magic power is being chosen a lot in the jungle because of the high skill at directing enemies, causing many players to feel very inhibited.

As for the buffed generals, these are all names that have been horribly nerfed in the last version. Or are the outmeta generals compared to his peers. Typically, Sylas gets a little buff up and then nerf, then buffs and nerfs, buffs and nerfs, buffs and nerfs . all the time.

That's some initial information about buffs and nerf champions in League of League 9.22. Still know that maybe your favorite champion is being nerfed and those champions you don't want to touch are buffed like god, but we always have to accept what Riot Games brings to gamers.
