

List of iPhones that support fast charging

People often overlook the importance of fast chargers and the convenience it offers. Below is a list of iPhones that support fast charging.

Smartphones these days are incredibly powerful and have a ton of capabilities, but there's one key link that can turn a great device into a nuisance, it's battery. Even when battery capacity is not an issue, phones always need charging and people often overlook the importance of fast chargers and the convenience it offers.

The ability to quickly fully recharge the battery or cut the charging time dramatically is sometimes valuable. And while the iPhone 11 Pro and Pro Max come with 18W fast chargers, you won't get the same treatment if you go with the iPhone 11. This model is a popular choice and has nearly all of your features. Its older sisters, but it comes equipped with an extremely outdated 5W charger. And then there was the iPhone 12 series. The impossible happened and Apple shipped phones that didn't come with chargers, only USB-C to lightning cables.

But before you start the environmental debate or speak out for (or indignantly) think of this cut as a rare opportunity, you are free to buy another brand's fast charger. you don't feel guilty about dumping your Apple charger at home. Below is a list of iPhones that support fast charging.

According to Apple, you can charge 50% of the battery in about 30 minutes on these iPhone models:

iPhone models that support fast charging:

1. iPhone 8, iPhone 8 Plus
2. iPhone X, iPhone XS, iPhone XS Max
3. iPhone XR
4. iPhone 11, iPhone 11 Pro, iPhone 11 Pro Max
5. iPhone 12 mini, iPhone 12, iPhone 12 Pro, iPhone 12 Pro Max

How to help iPhone charge faster

To help your iPhone charge faster, follow these steps:

1. Use an Apple 18W, 20W, 29W, 30W, 61W, 87W, or 96W USB-C charger
2. Comparable third-party USB-C power adapter supporting USB power distribution (USB-PD)
3. Cable that converts from USB-C to Lightning

The above are all wired charging options, because fast charging is all about speed and power, and wireless chargers can't chase this speed. For those who prefer comfort and convenience over efficiency, there is another helpful list of the best wireless chargers for iPhone (and Samsung).
