

List of MSI motherboards that support Windows 11

Motherboard manufacturer MSI has provided a list of products that support Windows 11 - Microsoft's latest operating system for users to refer to before deciding whether to upgrade to Windows 11 or not.

Windows 11 has officially launched and motherboard manufacturer MSI has also started providing a list of products that support Microsoft's latest operating system. Windows 11 operating system is not fully compatible with motherboards, they only support qualified motherboards.

1. Windows 11 and TPM 2.0

During the Windows 11 launch event, a Microsoft representative also said that they will require a system with better security and the main condition is a TPM 2.0 security chip. This is a component that has been around for a long time on the market, but they are not noticed by many users due to their lack of popularity. However, by Windows 11, they have become the most searched keyword on Google after 24 hours of launching the operating system. The requirement for TPM 2.0 security chip causes many manufacturers a headache because not all motherboards are equipped.

According to general reports, motherboard manufacturers started using TPM 2.0 chips in 2016 and are still equipped today. In order to meet accurate information to the market, MSI has published a list of motherboard models that support the latest Windows 11 operating system.

2. List of MSI motherboards using Intel Chipset supporting Windows 11

As for the MSI series, the motherboards that support Windows 11 are extremely diverse and they are divided into different groups by Chipset generation.

MSI Motherboard Intel Chipset 100-Series Supports Windows 11

Motherboard series H110

1. H110 PC MATE
2. H110M-A PRO M2
3. H110M PRO-VHL
4. H110M PRO-VH PLUS
5. H110M PRO-VOLUME
6. H110M PRO-VDP
7. H110M PRO-VDL
8. H110M PRO-VDHP
