Introducing the game **Arknights Endfield**

Arknights: Endfield is an RPG from developer Hypergryph, published by GRYPHLINE, and set in the same universe as the previous Arknights game. However, Arknights: Endfield doesn't feature the basic RPG or hack-and-slash gameplay found in big names like Genshin Impact or Wuthering Waves. Instead, its gameplay incorporates a factory simulation feature to create an automated resource production line (also known as an Automated Industry Complex). Along with that, core elements that have made modern RPGs so appealing, such as four-character team-ups, skill combos, and shield-breaking mechanics, are also present in Arknights: Endfield.

Although set in the same universe as its sibling Arknights, Arknights: Endfield boasts its own unique storyline on a planet called Talos-II. Playing as an Endadministrator, we will gradually uncover secrets and embark on adventures at Endfield Industries.

How to get more Arknights: Endfield codes

Join the game launch event.

Following its official international launch on January 22, 2026, Arknights: Endfield held a series of launch events including pre-registration and Final Prep Orders. In addition to in-game rewards providing valuable resources in the early stages of the game, game codes were also included as part of these events.
