

# List of Oppo phones that will not be updated to Android 15 (ColorOS 15)

If you have an Oppo device, refer to the list of ineligible devices below to see if you need to change your phone to experience the new version of Android.

Android 15 is in the final stages of development. Last month, the operating system achieved platform stability with the release of beta 3. Recently, beta 3.1 also launched, fixing some issues related to lock screen and facial authentication.

Oppo usually offers a beta program to allow users to install early versions of the operating system before a stable release, and this year is no exception. This time, Oppo Find N3 has been chosen to run Android 15 beta. The beta program will then gradually expand to more devices in the coming weeks.

The upcoming operating system will certainly be an interesting upgrade, coming with a series of improvements, additions and interesting changes to help enhance the user experience. However, not all devices will be eligible and upgraded to Android 15.

If you have an Oppo device, refer to the list of ineligible devices below to see if you need to change your phone to experience the new version of Android.

Note that this is not yet the final list. The devices listed in this book are classified based on the software update policy that Oppo is applying to all of its existing devices.

Oppo's software update policy stipulates that there will be four consecutive Android updates for new generation high-end phone models, while older models only receive three operating system updates. Reno, F and K-series models receive two consecutive operating system updates. Oppo's low-cost A-series models will usually only receive one Android update. However, a given product line may be updated two years in a row.
