

List of the latest VLC channel, watch TV on your computer with VLC software

The latest VLC channel list view on computer television is a channel list that allows viewers to connect to the network to watch TV programs through a software called VLC software. This software supports online viewing very effectively with the advantage of watching without being shocked or shaking.

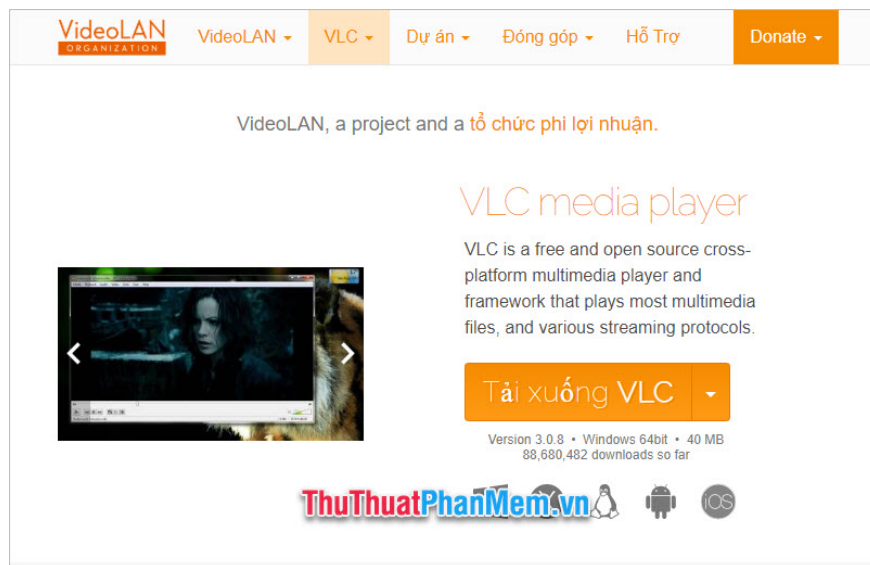

The latest VLC channel list view on computer television is a channel list that allows viewers to connect to the network to watch TV programs through a software called VLC software. This software supports online viewing very effectively with the advantage of watching without being shocked or shaking. Let **TipsMake.com** review the list of names of the latest VLC channels today.

1. Use VLC software to watch TV channels

To be able to use the VLC channel list to watch television, you first need to install the VLC media software.

Download VLC media player [here](#)

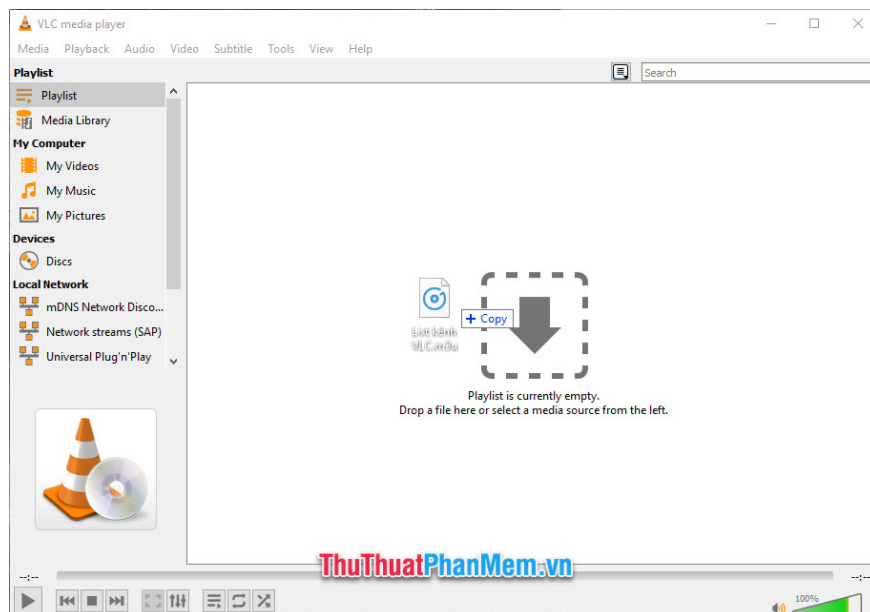

After downloading this software, you proceed to install on your computer according to the instructions of the installation package.

VLC software is not only used to watch live channels, but you can also use VLC as a video presentation tool, convenient to replace other similar software.

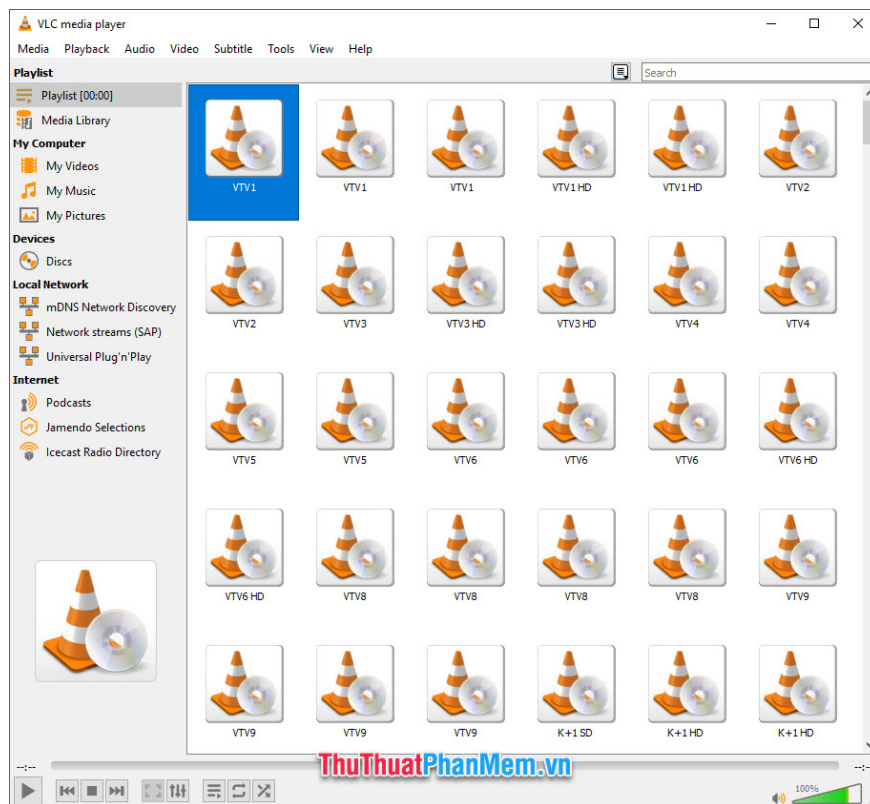

2. Use VLC channel list to watch TV

After installing VLC software on your computer, you can add the available playlists to the software to watch.

Very simple implementation, just drag the channel list file into the **Playlist is currently empty** space .

Then you will see in the playlist list appears the channel list that you just added. You click open this list to:

The channel list that **TipsMake.com** provides for you includes, summarizing the Vietnamese channel list provided by FPT.

However, to be able to watch these Vietnamese programs, you need to open iTV stream on ADSL network of FPT network. To do this, you can contact the FPT switchboard on 1900 6600.
