

Listen to virtual assistant Alexa pronouncing the name of Europe's longest town

Amazon Echo can recognize your voice then analyze and process and give answers to all questions about many areas of life. When you need to boot you just need to say Alexa.

Amazon Echo is a voice-controlled portable speaker model thanks to integrated Alexa personal assistant. This device is a great combination of the ability to recognize Siri's voice and a speaker.

Amazon Echo can recognize your voice then analyze and process and give answers to all questions about many areas of life. When you need to boot you just need to say " *Alexa* ". Amazon Echo includes many different functions from music player to dictionary, time clock, weather forecast .

Llio Angharad, a Welsh blogger who tried the Amazon Echo device by asking it to pronounce the name of a European town - the town with the longest name in this continent: Llanfairpwllgwyngyllgogerychwyrndrobwllllantysiliogogoch.

When Llio Angharad asked, " *Where has the longest name in Europe?*" Alexa answered correctly: "*Llanfairpwllgwyngyllgogerychwyrndrobwllllantysiliogogoch is the place with the longest name*".
