**Step 2:** In the player, click the play button icon on the left as shown in the image, the music player will turn into a Youtube video.

Note that when you leave the video playing mode on Music Pro, then when you stop playing the video and turn off the screen, it will not be able to continue playing the video playing on the lock screen. So switch to music playback on **Music Pro** to play music.

Through the Music Pro guide above, you can listen to music and stories on Youtube when turning off the screen that other music playback applications do not have.
