10 am (at Steve Jobs Theater, California, USA) at about 00 Vietnamese time tonight, the launch of the new iPhone series will begin, follow the information about the event of iPhone 8 / 8Plus and iPhone X launch from the page here

If you own devices running iOS and macOS like iPhone, iPad, Macbook, open Safari and go to the following link to view live: <https://www.apple.com/apple-events/september-2017/>. If you're using Windows 10 or open that link with Edge. Only these two browsers support Apple's HLS live stream technology, so you can only view this event on the specified devices.

01:48: The biggest changes of X: bigger screens, fewer borders. Front camera / sensor has Face ID. No Home button. iPhone X will start with prices from 999 USD (64 GB and 256 GB), can be ordered from October 27 and 3/11 will receive the item.

01:44: The A11 chip is like iPhone 8/8 Plus, 2 hours better than the iPhone 7 battery. Wireless charger Qi, a new charging standard called AirPower, can charge multiple iDevice devices at the same time. But will have to wait until 2018 to own this charger.

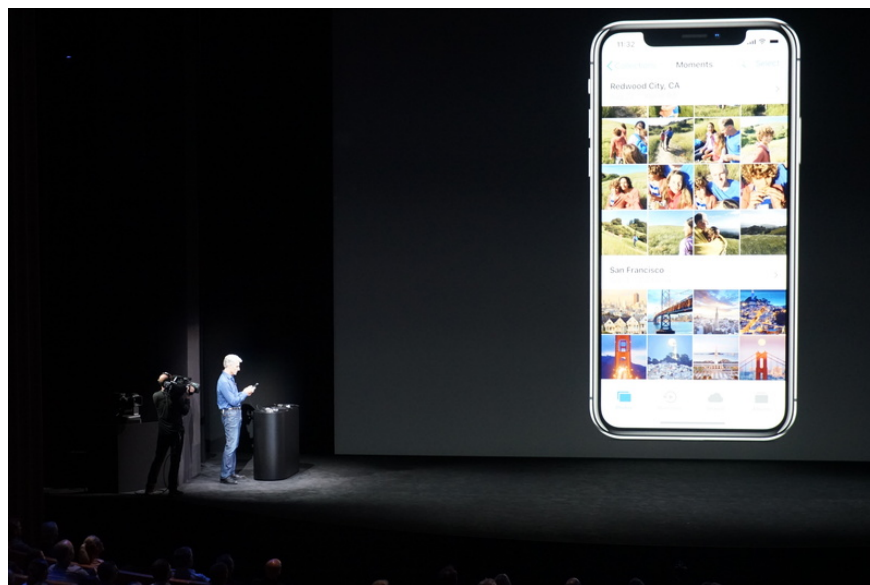

01:41: 12 MP dual camera, optical zoom both front and back cameras, new color filter, flash Quad LED True Tone, night photography, low light conditions are still very beautiful. Portrait Lighting mode for better "selfie" photos.

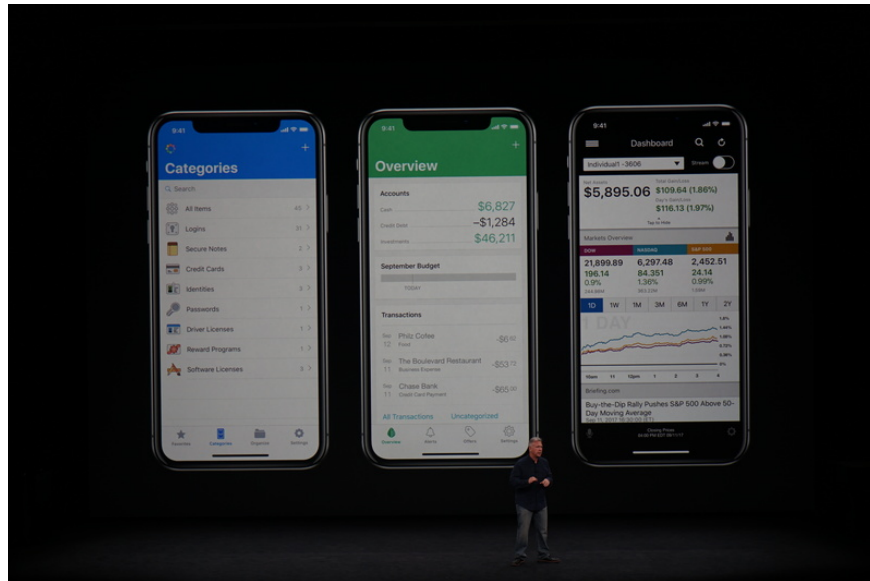

01:36: Demo iPhone 10. The face detection and tracking unit works great, it recognizes extremely accurate faces, keeps track of every user's face movements, laughs, mouthless movements same impression.

01:24: Face ID: Unlock with your face. It uses a real depth camera system, made up of an infrared camera, front camera and two more. Face ID increases security more, the possibility of someone else opening your device is 1 in 1 million. Face ID works with Apple Pay and other third-party applications. TrueDepth Camera System allows Face ID - and new ways to customize emoji according to face movement.

01:21: iPhone X. The official name is iPhone 10. OLED 5.8-inch screen 2436x1125 pixels, 458 ppi highest pixel density in iPhone, front and back glass, close edge screen. Made of stainless steel and glass. They form a continuous surface from front to back. No Home button. Touch to turn on the screen.

01:15: You can upgrade to iOS 11 on September 19

01:15: iPhone 8 Plus starts at \$ 799.

01:15: iPhone 8 starts at \$ 699.

01:15: iPhone 8 has 64/256 GB memory. \$ 699 is the starting price

01:15: iPhone 8 will start at 64 GB and 256 GB

01:15: Support for LTE Advanced, Bluetooth 5 for wireless connectivity. Wireless charging.

01:00: Slow video recording can achieve 240 frames per second. Augmented reality is integrated into iPhone 8. Improved gyroscope and accelerometer to track AR motion. ISP, GPU all work to strengthen AR. The GPU provides more realistic graphics.

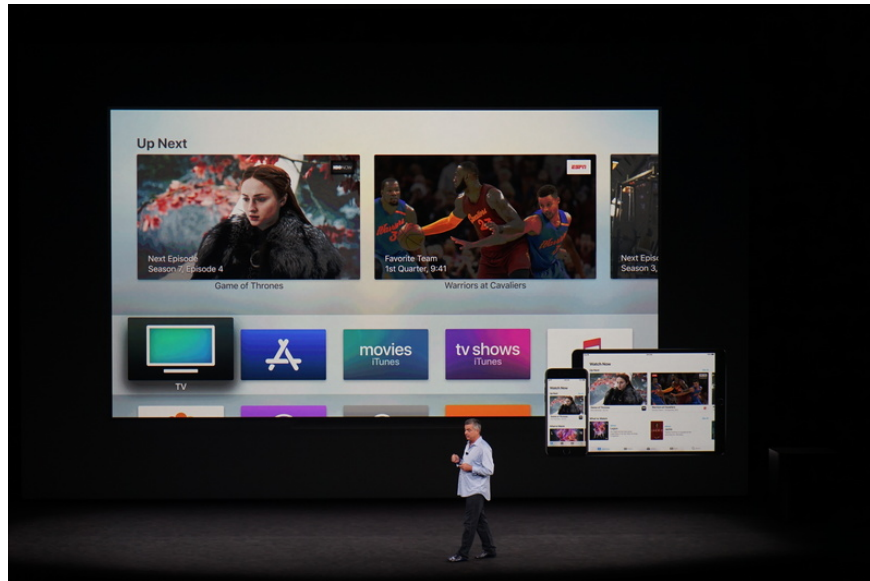

00:56: iPhone 8 and iPhone 8 Plus have 4.7-inch and 5.5-inch screens, front and back glass. True Tone screen, 25% louder speaker, new A11 Bionic chip, the fastest and most powerful chip in the smartphone line, has 6 cores in the CPU. A11 chips are 70% faster than A10, save 4 times more electricity, double the efficiency.

00:55: Start talking about the iPhone. Tim Cook reiterated the first experience when using the iPhone, the development of the iOS operating system on iPhone lives as well as its applications: FaceTime, iMessage.

00:42: About Apple TV: 4K, supports industry standard HDR 10 and Dolby Vision. Using the A10 X chip is the same as on the iPad Pro 2017, which helps double the speed, graphics processing is 4 times faster. It runs the TV OS. Playing games on Apple TV is like watching movies because the pictures on Apple TV are very beautiful. Price \$ 179, started ordering on September 15 and received the goods from September 22

00:40: September 22 starts selling Apple Watch.

00:36: Demo calls with Apple Watch on stage, sound is recorded directly from the Apple Watch mic, the quality is quite good.

00:30: Apple Watch has 4G, has built-in SIM, stream music from Apple Music to headphones to listen via Bluetooth headset without a phone. There is a new processor chip that is 70% faster. Apple Watch uses a custom W2 chip with Wi-Fi 85% faster and 50% more power efficiency.

00:27: Apple Watch can detect abnormal heart beats and give warnings.

00:18: Introduction to Apple Watch: Changing Apple Watch's features and designs for those who like to swim, can measure heart rate with more useful information. Apple wants to use Apple Watch as a device to monitor health, fitness and help more people.

00:12: Ahrendts offers a new experience at the store called "Today at Apple".

00:11: Apple Stores will be called Town Squares.

00:05: Angela Ahrendts, senior vice president of retail and online stores, is currently on stage.

About Apple Park

Talk about memories with Steve Jobs: Tim Cook opened the ceremony with memories of Steve Jobs.

The launch of iPhone 8 begins
