

# Lock folders, set folder passwords, folders easily and safely

Lock folders, set folder passwords, folders easily and safely. On every computer, we always have different important data. And especially the private data that you don't want strangers to get into. But you still do not know how to lock a blind

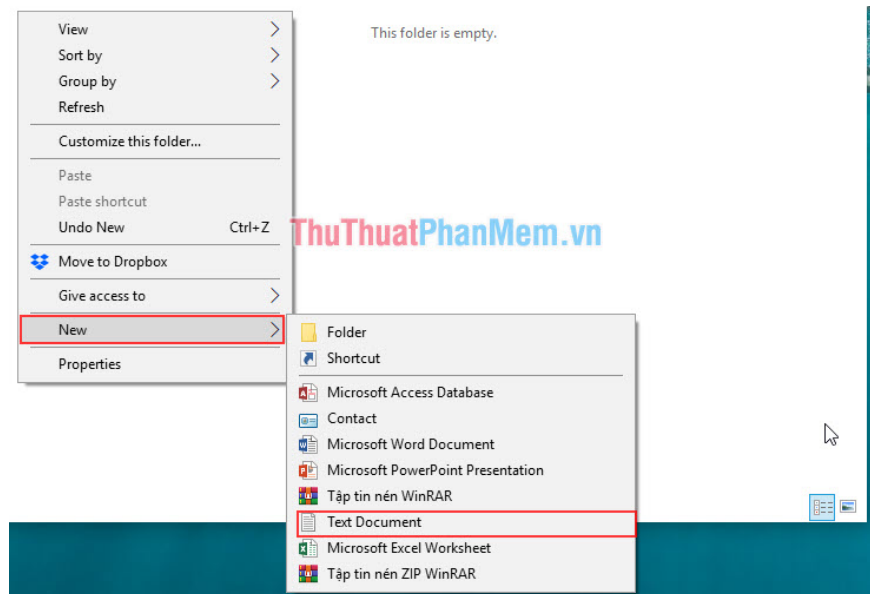

On every computer, we always have different important data. And especially the private data that you don't want strangers to get into. But you still do not know how to lock a folder like? Today, Thuthuatphanmem.vn will show you how to easily and safely lock a folder.

## I. Using the Code

**Step 1** . The first thing you need to do is create a directory as usual and name it any name.

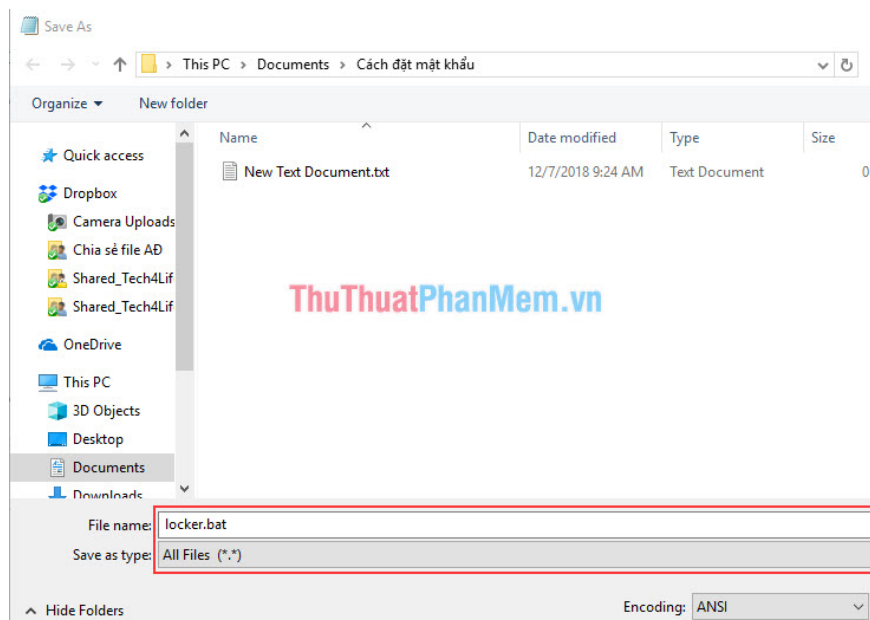

**Step 2**. Open the folder you just created, proceed to create another **Text Document** by right-clicking on the blank space in the folder and selecting **New -> Text Document**.

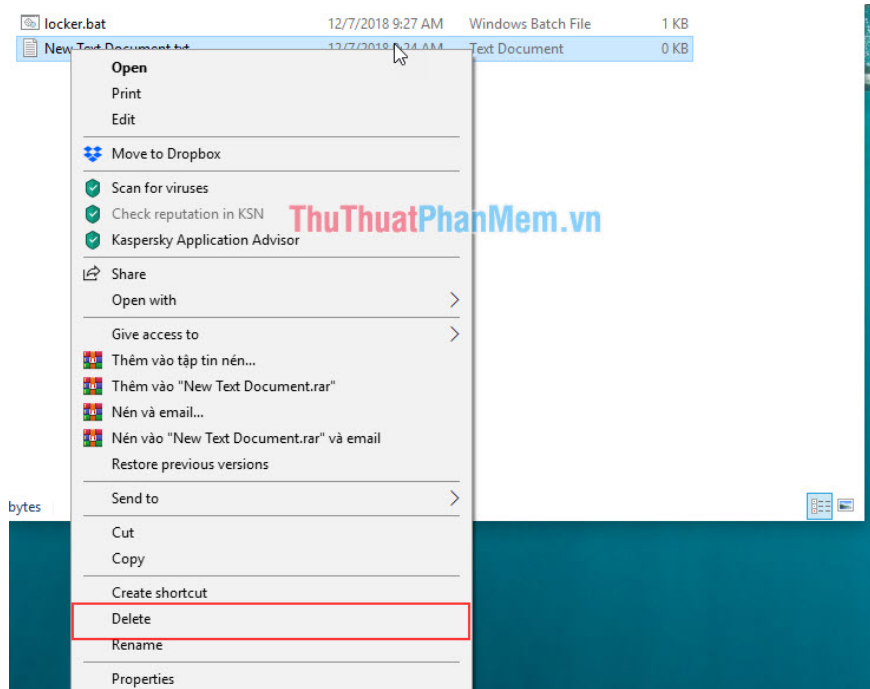

Next, open the **Text Document** file you just created. Please copy the whole code below:

```
cls @ECHO OFF title Folder Private if EXIST "HTG Locker" goto UNLOCK if NOT EXIST
```

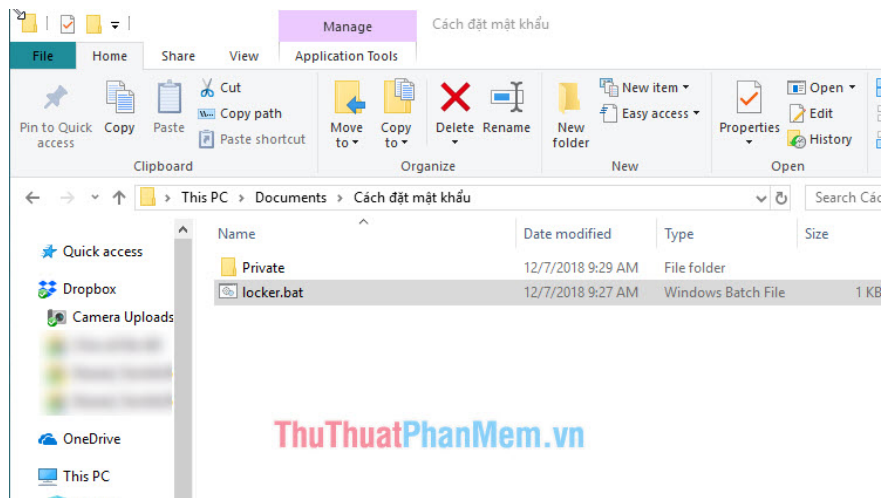

(Note: In the above code, you change the password you put in place *MAT\_KHAU\_O\_DAY*. Then, select **File** -> **Save as** -> and name the file **locker.bat** and select Save as type: **All File** . )

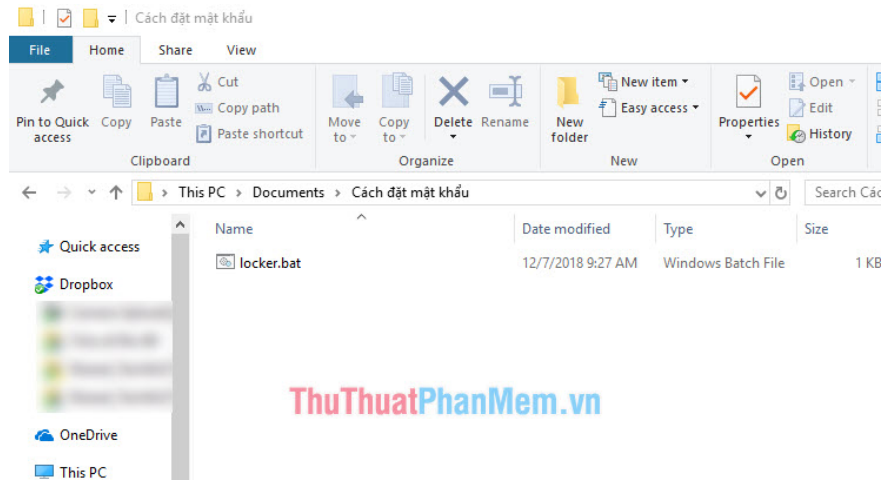

**Step 3.** Now you can delete the original text file.

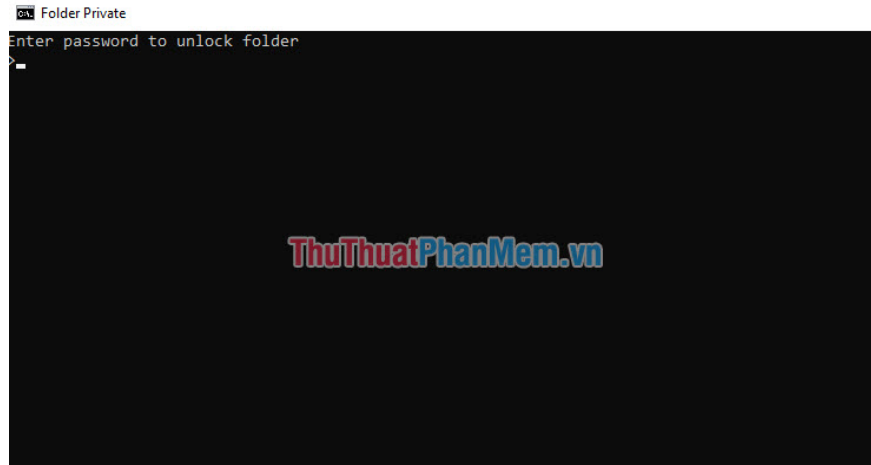

**Step 5.** You open the locker.bat file. At this point the computer will create a new folder named Private. This Private folder is where you can store important files and documents.

**Step 6.** After proceeding to move the necessary folders into the Private section, open the locker.bat file again. Immediately there is a dialog box asking if you agree to hide the Private folder, you just press Y and Enter.

**Step 7.** To access the Private folder, all you need to do is open the locker.bat file and enter the password you set and press Enter.

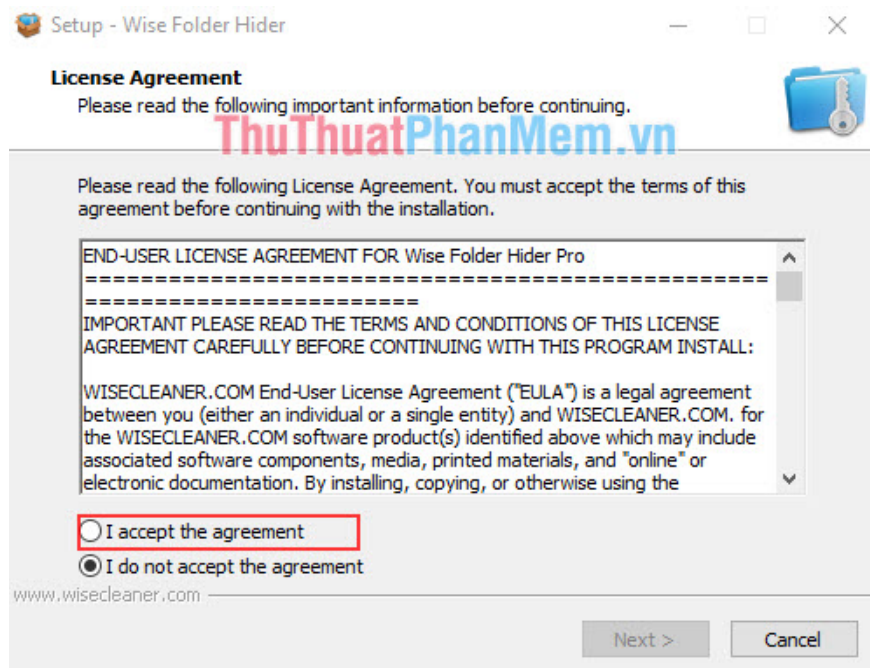

## II. How to lock the folder with Wise Folder Hider.

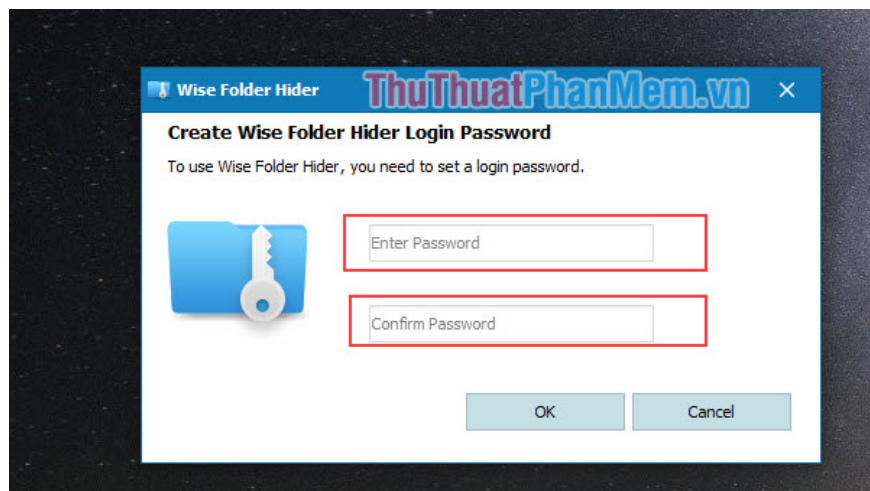

**Step 1:** You access the link below to download Wise Folder Hider.

<https://www.wisecleaner.com/wise-folder-hider-free.html>
