

Log in to Zalo Web quickly without a password

Zalo web is the zalo version designed specifically for computers and laptops in addition to the version on current mobile devices. And this is also the version you can easily log in without a password!

Zalo is a mobile application, developed with the aim of building a network to become a social network in Vietnam. For most smartphone users, Zalo seems to be too familiar. But in addition to mobile phones, you can also log in to Zalo web - a platform developed specifically for computers and laptops, helping users to easily log in and exchange information with friends and partners anytime, anywhere, anywhere.

Are the features of Zalo web different from the mobile version?

Basically, using Zalo on the website version is no different from the mobile version. In other words, when using **Zalo web**, you can still use all the features of the mobile version such as:

1. Text and call all friends and contacts using Zalo
2. Send files with supported capacity up to 1GB
3. Synchronize all data, chat history, calls with Zalo mobile version

In addition, the outstanding advantages of **Zalo web** can be mentioned as:

1. No need to download or install any software on your computer or laptop
2. Not infected with viruses through the network environment (Except downloading virus-infected files)

3. The application is lightweight and does not take up much device resources.
4. Automatically save passwords for future logins

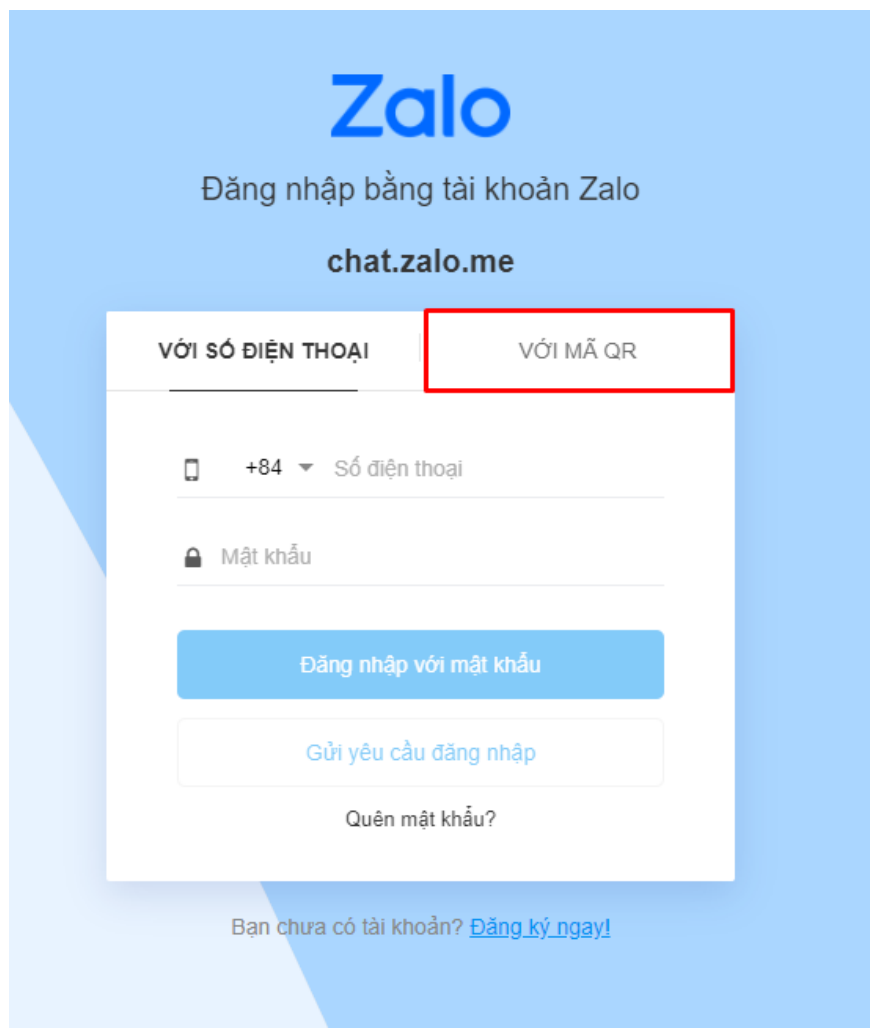

Log in to Zalo Web without password

In addition to using the usual username and password, you can also use 2 quick login methods without using a password. This is also quite useful if you accidentally forget your Zalo password.

When logging into zalo web on computers, laptops via browsers such as Coc Coc, Chrome, Firefox. you can use the 2 ways below:

Log in to Zalo web by scanning QR code

After accessing zalo web [here](#) , on the main interface you choose to log in **with QR code**

At this point, the website will give you a QR code to log in.

Zalo
