

# Logo leakage and Microsoft Edge screenshots based on Chromium

The leaked information related to the new version of Edge browser (Microsoft's kernel-based development) has spread rapidly on many technology forums in the past week.

The leaked information related to the new version of Edge browser (Microsoft's kernel-based development) has spread rapidly on many technology forums in the past week, including images that are supposed to be installed by the installer. Set Edge and seem to be the icon of the Edge Canary.

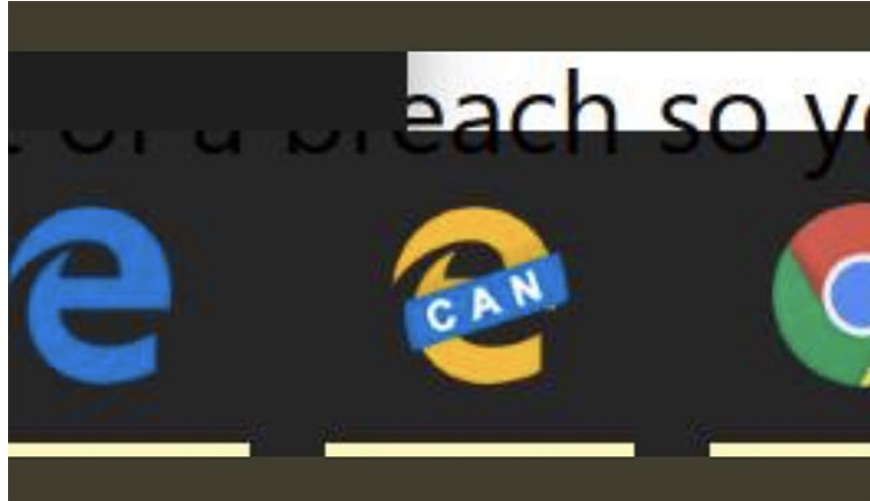

In December 2018, Microsoft announced that it would abandon its current Edge browser and rebuild it from scratch and comprehensively using the Chromium rendering engine. This is a reasonable step for Microsoft to save the "no-braking" situation of the Edge platform.

On February 24, a Twitter user named ADeltaX posted a tweet about the setting screen of the upcoming Edge version of the browser.

1. Microsoft introduced HoloLens 2 AR, emphasizing comfort and wearable feel, for \$ 3,500

A few days later, Chris Heilmann, director of open Web development and browsing at Microsoft, also uploaded an image on his desktop, displaying two Edge browser icons and an icon. another for Chrome. The middle icon will most likely be Edge's, the yellow that goes with the word "CAN" on it, indicating that this may be the Canary build of the Edge-based Chromium browser.

Chrome's Canary is nightly build builds with yellow icons and contains the latest features added to the browser.

## **Review the information about the Edge-based Chromium browser**

As you know, Microsoft announced that the new Edge browser will use the Chromium rendering engine to provide better site compatibility, and the platform will be standardized to build and test the site as well. Such compatibility with applications is more effective for businesses.

Although Microsoft did not explicitly state whether they deleted Google services from their browser, but according to the likely experts this situation will occur, Microsoft will replace the Chrome service with his services.

1. Microsoft launched a new Office 10 application for Windows 10 on the Store, completely free

However, in a related move, Kyle Pflug, Microsoft's senior product manager, in charge of the Microsoft Edge team, also posted on Reddit and stated that the new Edge browser will also support open utilities. Chrome wide.

For those interested in testing the new Edge browser, Microsoft said it will provide the platform as part of their new Microsoft Edge Insider program.
