

LoL space skins can become DTCL season 3 champions

This will be a list of DTCL champions Season 3 based on the skins belonging to the Space theme in League of Legends.

The Truth Arena 3 season will officially debut after a month. And many will wonder which generals will be appearing in Season 3. As previously reported, Riot has stated that the DTCL Season 3 theme will revolve around the Space theme with skin projects in League of Legends.

The generals will rely on the theme of skins like Star Guardian (Star Guardian), Odyssey (Space Squadron), Pulsefire (Ultimate Weapon) and Project skin (Supreme). All bring a modern direction and towards the war in outer space.

And now, we can look at what other skin skin themes will be included in this season's DTCL according to the lists below.

LMHT skin skins can turn into champions in DTCL season 3

Astronaut Set (Astronaut)

Include:

1. Astronaut Teemo
2. AstroNautilus

If DTCL season 3 was titled Space without taking this skin, it would be a pity. Although the Tribe based on this skin would probably be called Astronauts, it would be difficult for us to accurately predict what their power might be.

What would they do, tossing enemies up or flying around on the ring? Maybe, Teemo is the most notorious champion in LOL and he doesn't have many other skin skins so it would be a pity if Riot Games didn't add Teemo to this season's DTCL. As for Nautilus, he currently holds the "Water Guard" job in Season 2 so he may not be able to add it to Season 3, but who knows.

Cosmic Set (Universe)

Includes the following skins:

1. Cosmic Blade Master Yi
2. Cosmic Dawn Rakan
3. Cosmic Defender Xin Zhao
4. Cosmic Dusk Xayah
5. Cosmic Enchantress Lulu
6. Cosmic Queen Ashe

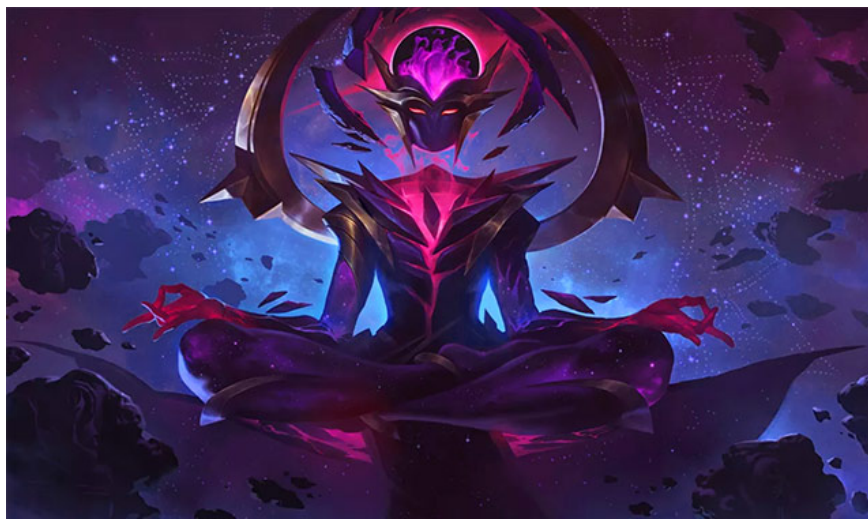

7. Cosmic Reaver Kassadin
8. Dark Cosmic Jhin

This is one of the major skins in League of Legends and if included in the DTCL season 3 is also very reasonable. Tribe based on this skin can be called Universe and will have synergy buffs related to attack speed. This will probably be a large Tribe with the number 2/4/6.

The problem is that there will be names in this skin participating in the DTCL season 3. Kassadin is the name that will definitely be in Cosmic Skin if this series is in season 3, while with names like Master Yi, Rakan, Xayah, Lulu, Ashe and Jhin are all likely to appear in the series. Other confirmed skins will be available in Season 3 DTCL.

Dark Star Set (Dark Star)

Including generals such as:

1. Dark Star Cho'Gath
2. Dark Star Jarvan

3. Dark Star Karma
4. Dark Star Kha'Zix
5. Dark Star Mordekaiser
6. Dark Star Orianna
7. Dark Star Shaco
8. Dark Star Thresh
9. Dark Star Varus

With the Dark Star skin, the chance of participating the generals with this skin is quite high. Most generals with Dark Star skins do not own other space skins. Therefore, the chances of participating in Shaco, Jarvan and Orianna if the Dark Star sets in DTCL season 3 is very high and these will be the first generals to appear in the Arena of Truth.

As for Cho'Gath, Thresh or Karma will be happy to join. And if Kha'Zix or Varus are also present, these will be the two generals participating in all three seasons of DTCL.

Dreadnova Set (Space Threat)

Include:

1. Dreadnova Darius
2. Dreadnova Gangplank

Only two generals own Dreadnova skin in this skin, and a synergy buff of only 2 generals like the Soul or the Lunar Tribe of the current DTCL Season 2 will make building the team easier.

Dreadnova's synergy buff might be something like the synergy buff of the current Beast. They will destroy anyone with weak health, either way they will be back in season 3 with excellent skin like this will be a very interesting thing.

Galactic Set (Milky Way)

Include:

1. Galactic Azir
2. Galactic Nasus
3. Galactic Renekton

All three come from the desert and have their own skin, so the synergy buff of this Galactic will be interesting. All three may be similar to the current Season 2 Nature and may appear more early in the game and will be a solid choice for early game.

In this Galactic series, Nasus is also a champion with another space theme skin, so his appearance rate in this Galactic will be 50/50. Only Crocodile and Azir are left without any extra space skin, so if Galactic is in Season 3, both will definitely be named on the list of champions.

Mecha Set (Robot)

Include:

1. Mecha Aatrox
2. Mecha Aurelion Sol
3. Mecha Kha'Zix
4. Mecha Kingdoms Draven
5. Mecha Kingdoms Garen
6. Mecha Kingdoms Jax
7. Mecha Kingdoms Leona
8. Mecha Kingdoms Sett
9. Mecha Malphite
10. Mecha Rengar
11. Mecha Zero Sion

This Mecha can be divided into two, including Mecha and Mecha Kingdoms. But that may not be the case as they are all related to robots and they will probably be the top tankers like Gladiator Season 1 or Rage Battle Season 2.

If so, then you must position to suit Aurelion Sol or Draven because these are not the usual tankers. Sett is the latest champion of League of Legends and it makes sense that he would be included in the DTCL Season 3. If Kha'Zix, Leona and Aatrox also participate, this will be their third season in a row to stand on the ring. The synergies for the Mecha buff will probably be 2/4/6 or 3/6.

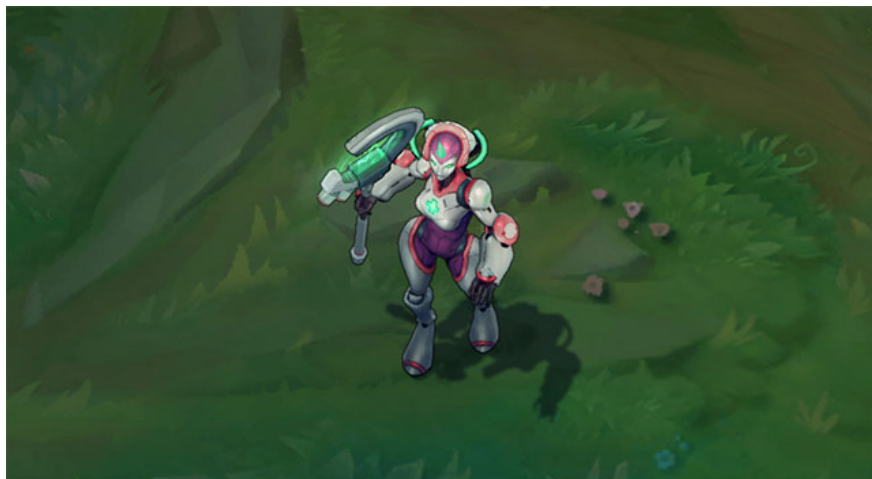

Program Set (Super Computer)

Include:

1. Program Camille
2. Program Leblanc
3. Program Lissandra
4. Program Nami
5. Program Soraka

Although this skin theme doesn't seem to be directly related to space. But they still look modern and quite suitable for this space theme. They can bring the Robot race back or can keep the supercomputer name and have something like the current Season 2 Light.

Either way, Camille, LeBlanc, Lissandra and Nami are all definitely on this list if Program appears in Season 3 because they don't have any other skin space. Soraka is probably out of this series in Star Guardian. If you remove Soraka, the Program synergies will consist of 2/4 champions and maybe more suitable.

Super Galaxy Set (Superman Galaxy)

1. Super Galaxy Annie
2. Super Galaxy Elise
3. Super Galaxy Fizz
4. Super Galaxy Gnar
5. Super Galaxy Kindred
6. Super Galaxy Nidalee
7. Super Galaxy Rumble
8. Super Galaxy Shyvana

If Riot Games didn't put this set in season 3, they really would have missed a Golden Tribe. The Super Galaxy set not only has interesting generals, but certainly a synergy buff will also be a strong choice in the Season 3 DTCL System.

The power of the Super Galaxy synergy buff will probably make the skills of the generals in this series stronger and more used. If so, this would be a suitable replacement for the current wizards.

Among the above names, Kindred will be a champion that will appear in all 3 seasons if added. Fizz and Rumble will appear for the first time. Nidalee, Shyvana and Gnar will be the second time to have appeared in season 1 and so will Annie as well in the current season 2. This set will likely have generals owning 3 different tribes.

Worldbreaker Set

1. World Breaker Hecarim
2. World Breaker Nasus
3. World Breaker Nautilus
4. World Breaker Trundle

Last and certainly not least. This World Breaker will have a synergy buff that can either break the enemy team's defenses or prevent attacks from the enemy squad. The amount of synergy buffs will probably be 2/4.

The problem here is that Nasus and Nautilus are present in many other skins and may be more useful in these skins. Hecarim and Trundle will appear for the first time in DTCL if this kit is added, although the number of Worldbreaker generals is not high enough to be included in Season 3 but this is an attractive skin.
