

Looking at these photos, you will no longer believe your eyes!

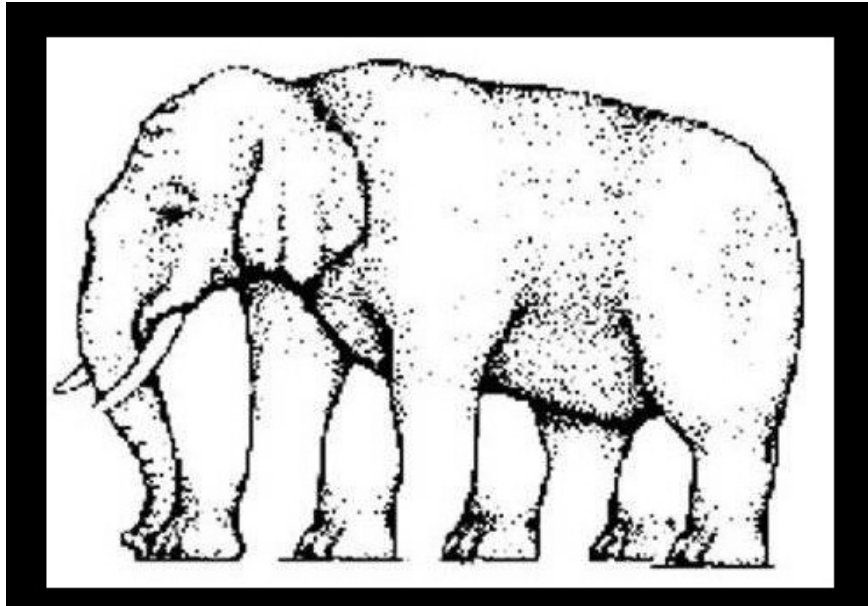

Try looking at the series below and tell us how you feel.

You are confident with perfect eyesight, 10/10 and always believe in what you see through your eyes. Try looking at the series below and tell us how you feel.

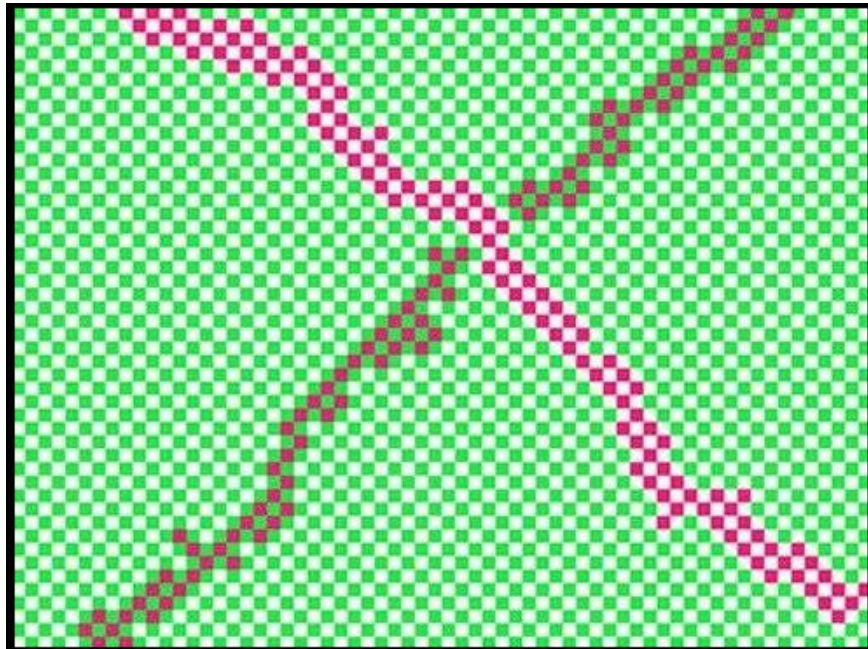

1. Look closely at the two central circles in the picture below and answer the question 'Is the left or right circle bigger?'. You may not believe it but the truth is they are equal.

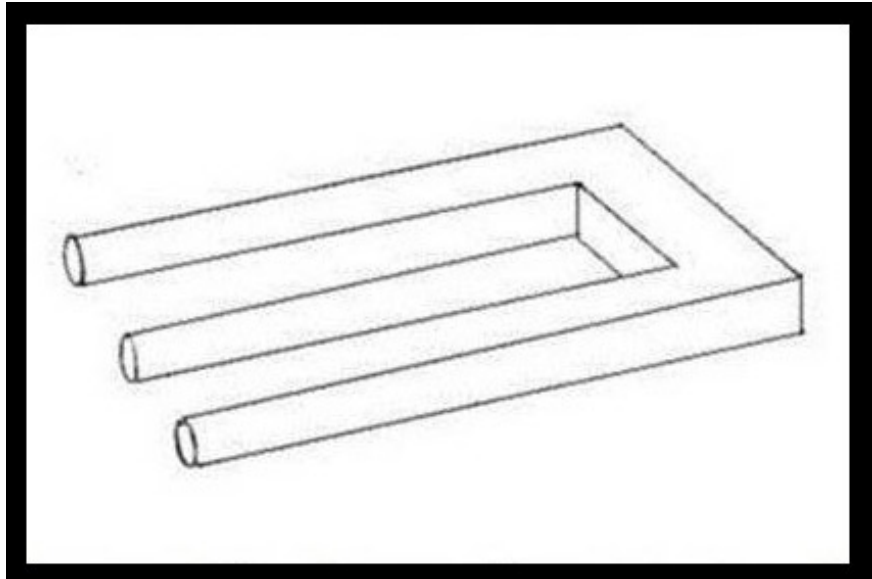

2. How many legs does this elephant elephant have?

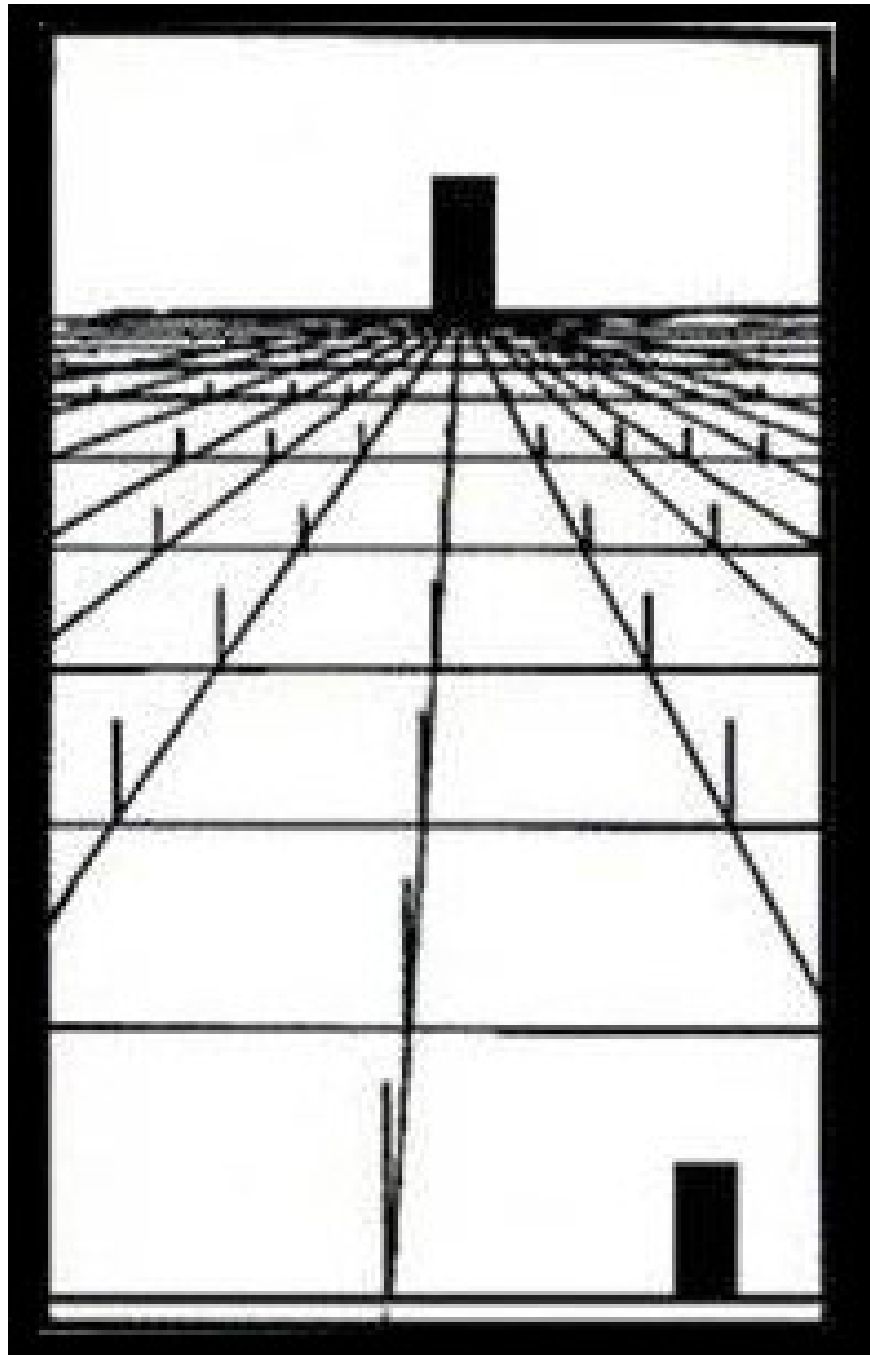

3. Look closely at the two pink diagonal lines in this picture, are they the same shades of pink or different?

4. In your opinion, does the object in the picture have 'legs'?

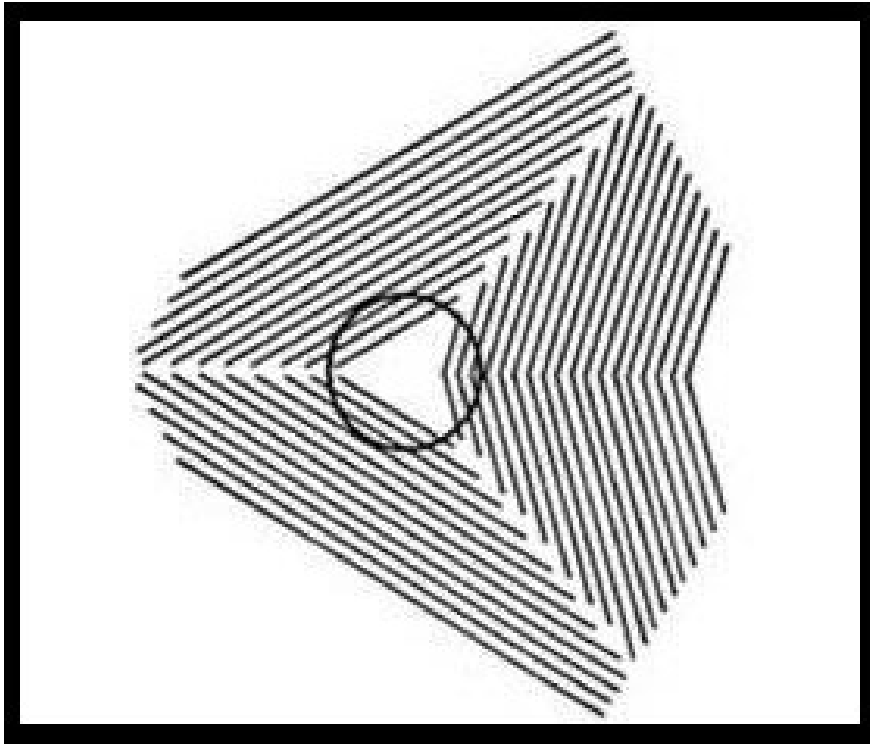

5. Which is the larger black rectangle in the picture below? The answer is that both are equal in size.

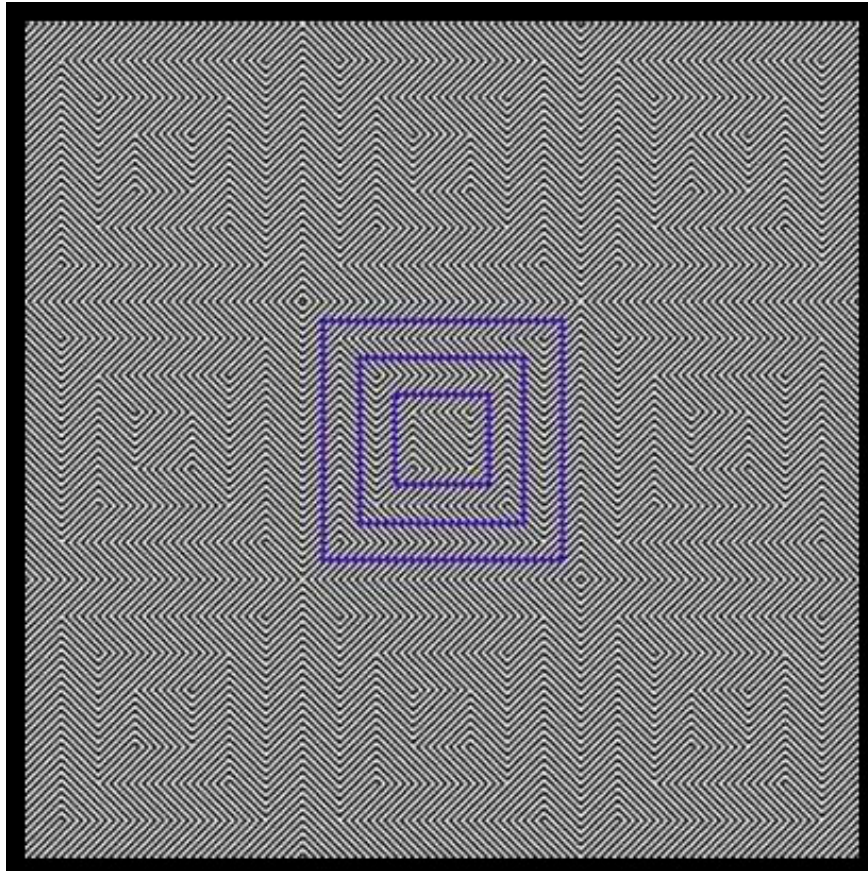

6. You may not believe it but the truth is that the picture below has only one green color.

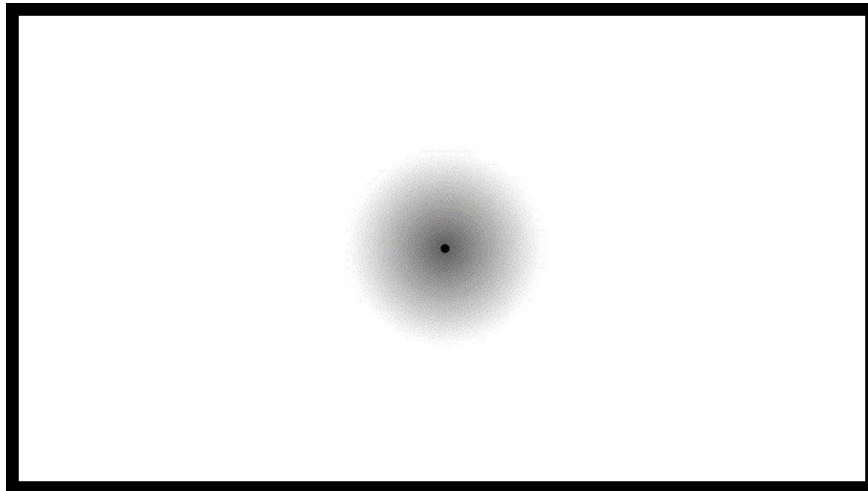

7. You see the circle in the image below distorted? Please use the test caliper.

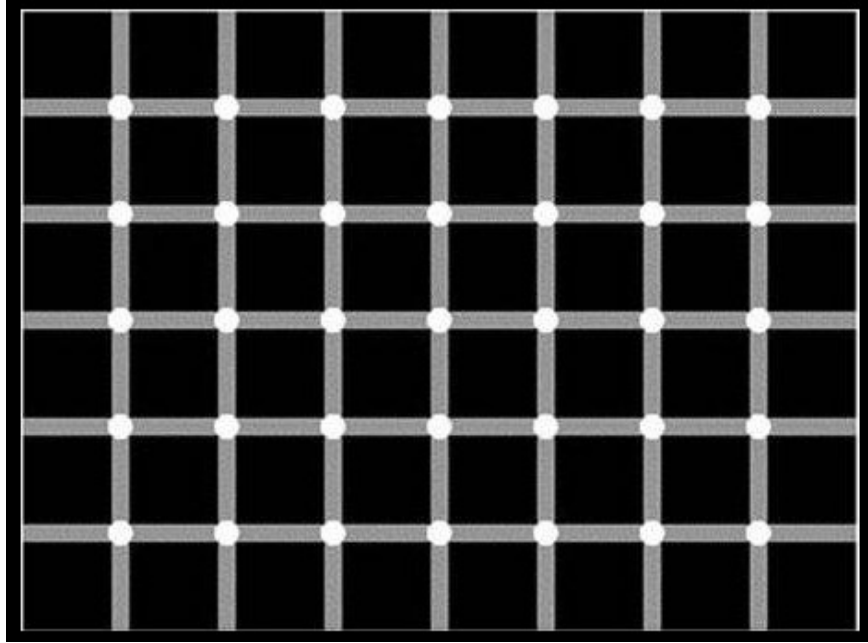

8. Due to optical illusion, you feel that the blue line in the picture is slightly tilted and rhombic. In fact it is a perfect square.

9. The magic happens when you focus your eyes on the dark dot in the middle (about 10-20 seconds). What is it, please experience yourself.

10. Can you count the number of black dots in the picture below?

1. 10 photos reveal the facts about life that amaze you
2. The following 12 optical illusion photos will make you dazzle
