

# Low-profile Android smartphone apps

In the following article, network administrator would like to introduce you to a list of lightweight applications suitable for older Android smartphones or lack of memory capacity.

Not everyone of us has the opportunity to own a new smartphone with generous memory and powerful processing capabilities. Sometimes we buy low-cost smartphones to save costs, sometimes buy to make extra phones, so there is no need to spend a lot of money, we can buy for relatives to use because they do not have high demand. However, low-profile smartphones sometimes do not run well as heavy applications such as Facebook, Messenger make the device laggy, idle during use because of lack of memory capacity to install such applications. Therefore, a lightweight application that can meet user needs and reduce memory status will be great. The article below Network administrators would like to introduce ultra-lightweight Android applications that greatly improve the user experience.

## 1. Facebook Lite

1. Download Facebook Lite

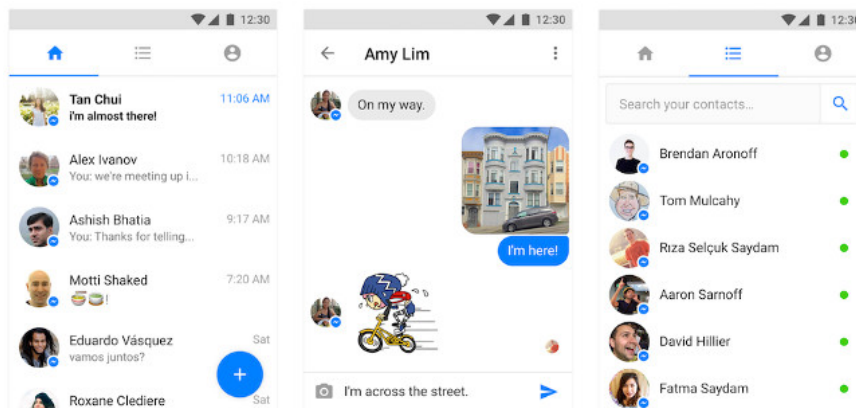

Facebook is probably the app that almost everyone needs to use to connect with friends, but the problem is that the full version Facebook app is heavy, even the flagship phones that have been used for a long time have been jerked, then the Lower configuration machines will be very tired when carrying the app. Facebook knows that, and they also want powerful users to have a better experience, so they launched Facebook Lite. This App has almost all the features you need at Facebook, from notification, video playing, reaction to messaging.

Basically this is an app and runs the mobile version of Facebook web platform inside, but who cares, it's good to use. When you use it, you'll find it runs much faster than the standard Facebook app, scrolling up and down is also smoother and lighter, and according to friends around you, it saves even more battery life. And thanks to the small file size, it won't take up too much space on your computer.

## 2. Facebook Messenger Lite

### 1. Download Facebook Messenger Lite

For those who are lazy to surf Facebook but only like texting, the lightweight advantage of Messenger Lite when using will be less expensive than 3G / 4G than the original. The downside is the absence of Sticker, GIF, Recording and no Chat heads. But okay, still chatting out words with sending photos is able to "saw" the world.

Once you have used Facebook app, it is hard to miss Messenger Lite. The features on this app are not inferior to the full version. This application will be very suitable for those who regularly message friends, significant savings of 3G / 4G capacity compared to the original application. Some of the missing features of this Messenger Lite app are the lack of Sticker, GIF, Recording and no Chat heads and Messenger Day (at least for the time being) so it can save you data.

## 3. Opera Mini

### 1. Download Opera Mini

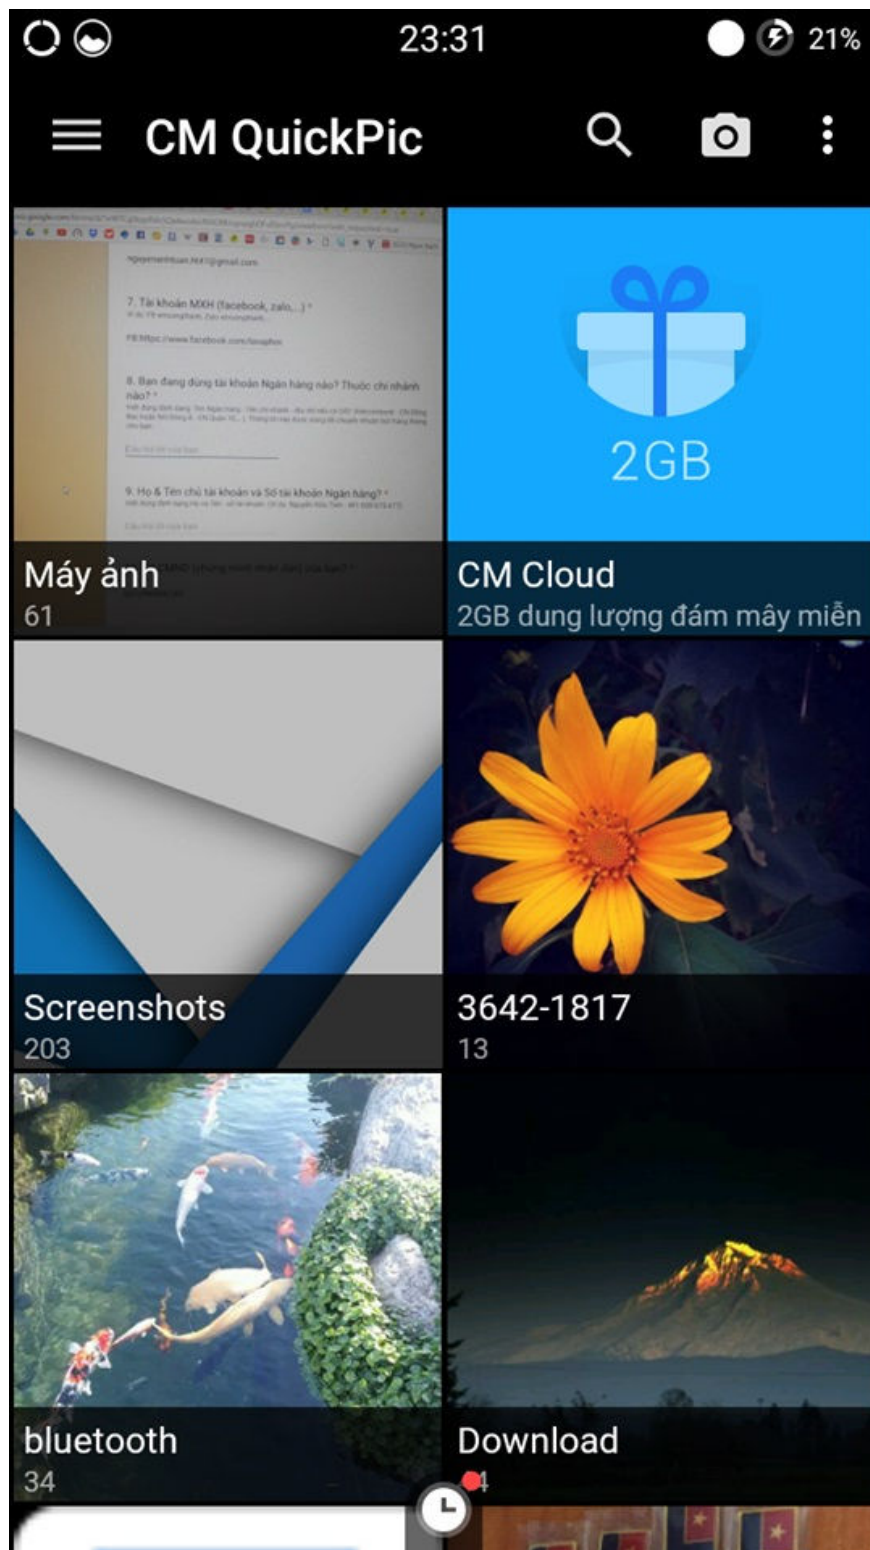

Small but martial is the right sentence for Opera Mini application. If with the default application on your computer or Chrome will make your "mobile phone" too heavy and consume no less battery and 3G / 4G data, then you try to change and use Opera Mini, the app has delivered Very nice flat surface. This app has two regular and Mini versions. Here we are talking about compact apps, so of course we have to install Opera Mini. Opera has now switched to using WebKit render engine similar to Chrome and Safari, so the web display is very good, almost no errors at all, not long after the web was broken like many years ago.

Opera Mini also has a nice feature that many 3G users will care about: save space. Opera's Data Savings mode compresses the website content before it drops to your phone, so the amount of 3G needed to download also decreases, the time is shortened. You can customize how the image quality will be compressed, from bad to beautiful. Of course if you want to save as much as possible, of course, select Low Quality mode.

## 4. QuickPic

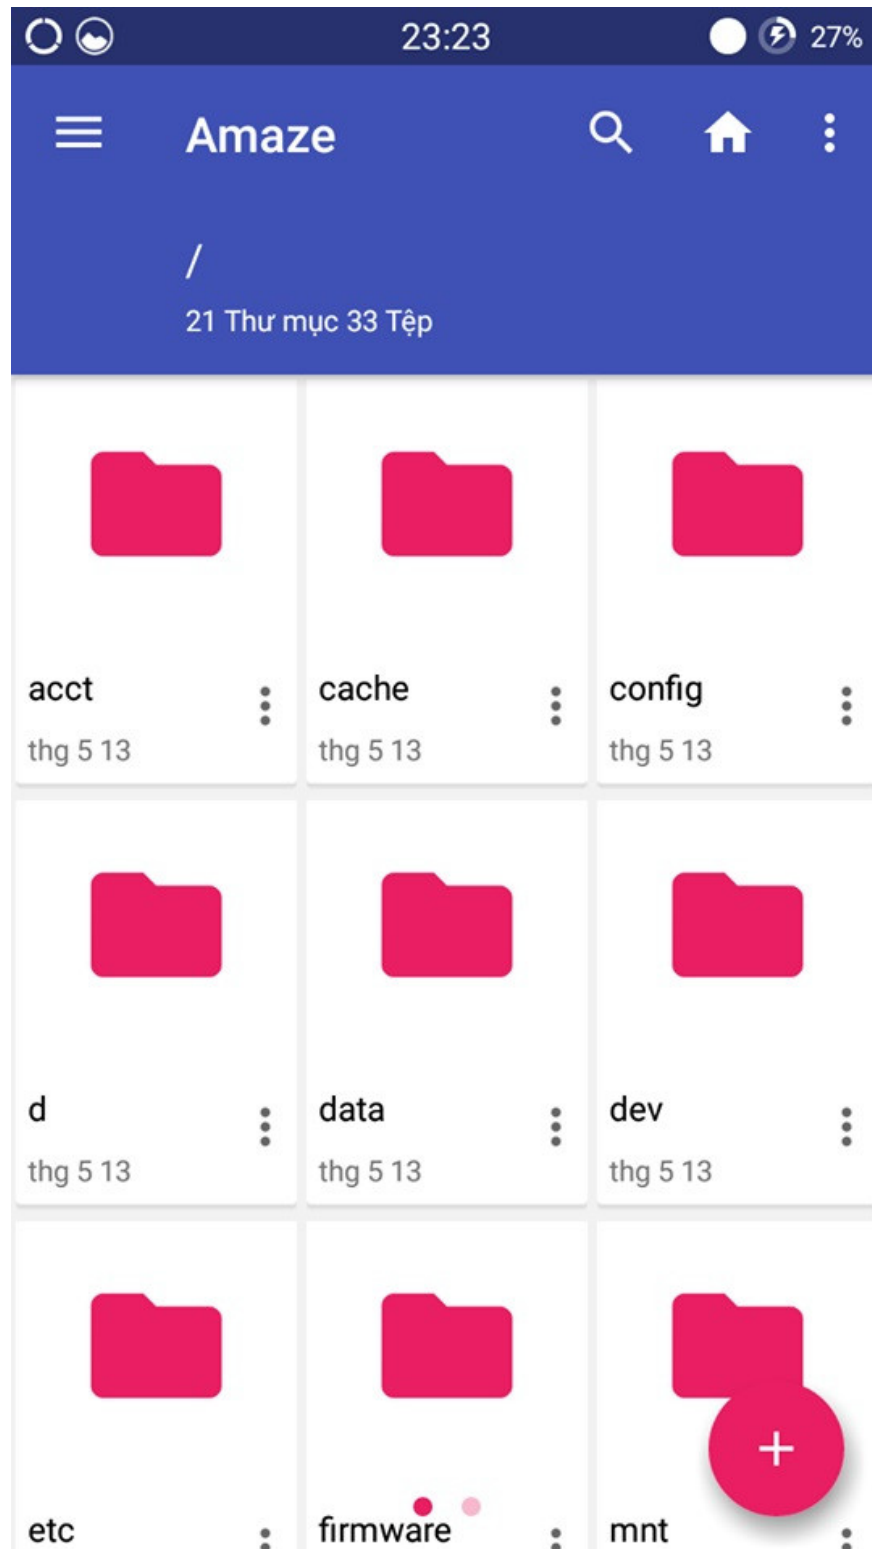

1. Download QuickPic

If you feel that the default photo library on your phone is not good enough, try the QuickPro app. The interface of the app is also made according to modern Material Design, focusing on simplicity and you only need to care about one thing: browse photos. The application has a super-compact photo browser combined with a modern "Flat style" interface that will surely delight you. One feature of using this application is that it has very fast image browsing capability, so there is no reason that you will not download and use this app.

## 5. Amaze File Manager

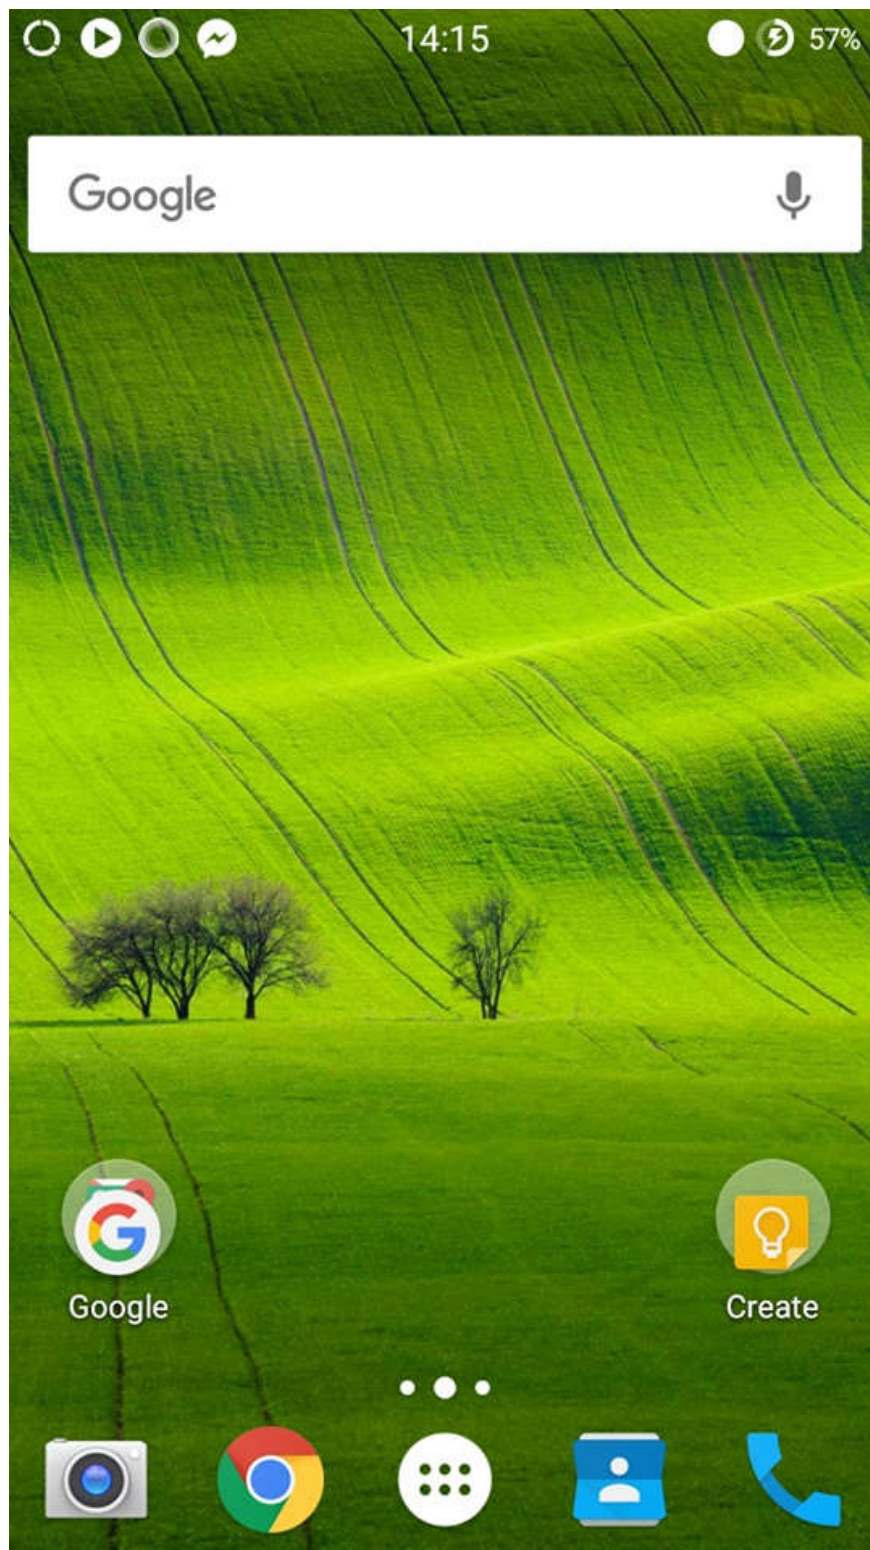

### 1. Download Amaze File Manager

If the file manager in your computer is not optimal enough, try Amaze File Manager. Amaze File Manager is a powerful file management application, perfectly compatible with Android 4.0 devices and above and free to use. Applications using the Material Design interface are very nice and file browsing is quite fast, no shock and lag phenomenon during use.

## **6. Nova Launcher**

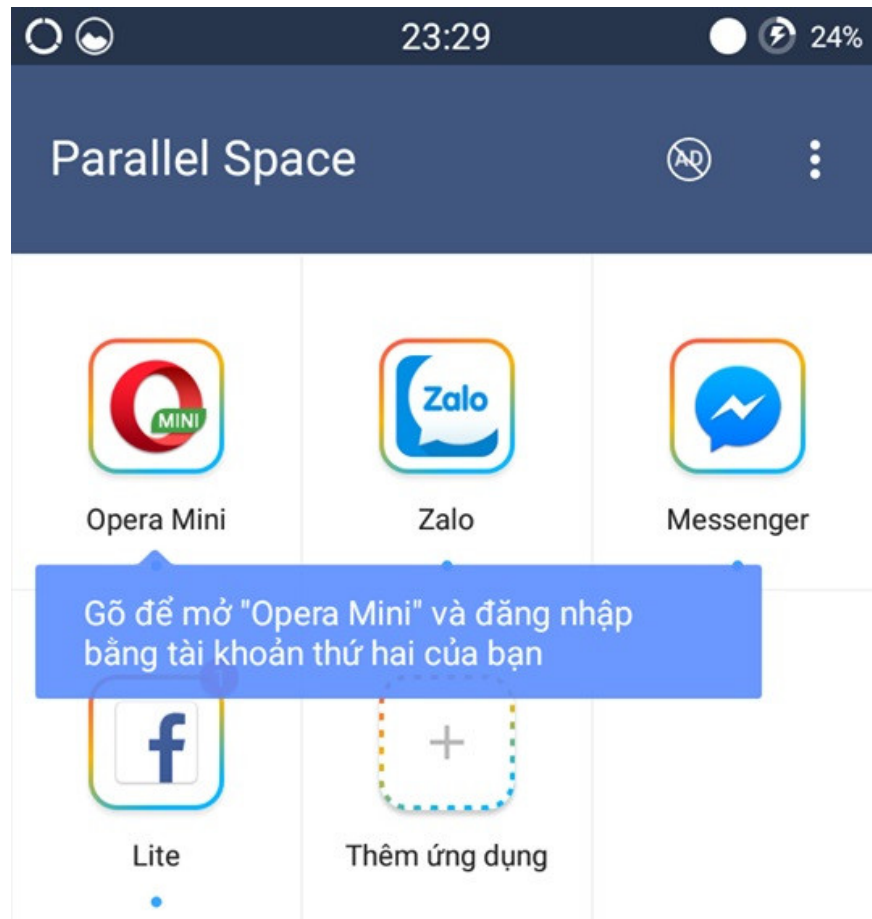

1. Download Nova Launcher

Nova Launcher is so famous in Launcher available on Android. Not only possesses light capacity, but also has extremely high customization ability so users can easily change many other customizable interfaces such as opening multiple applications on the same icon, night mode, increasing functionality for home button, . This is a launcher that is worth using to replace the default launcher on your computer.

## 7. Parallel Space Lite

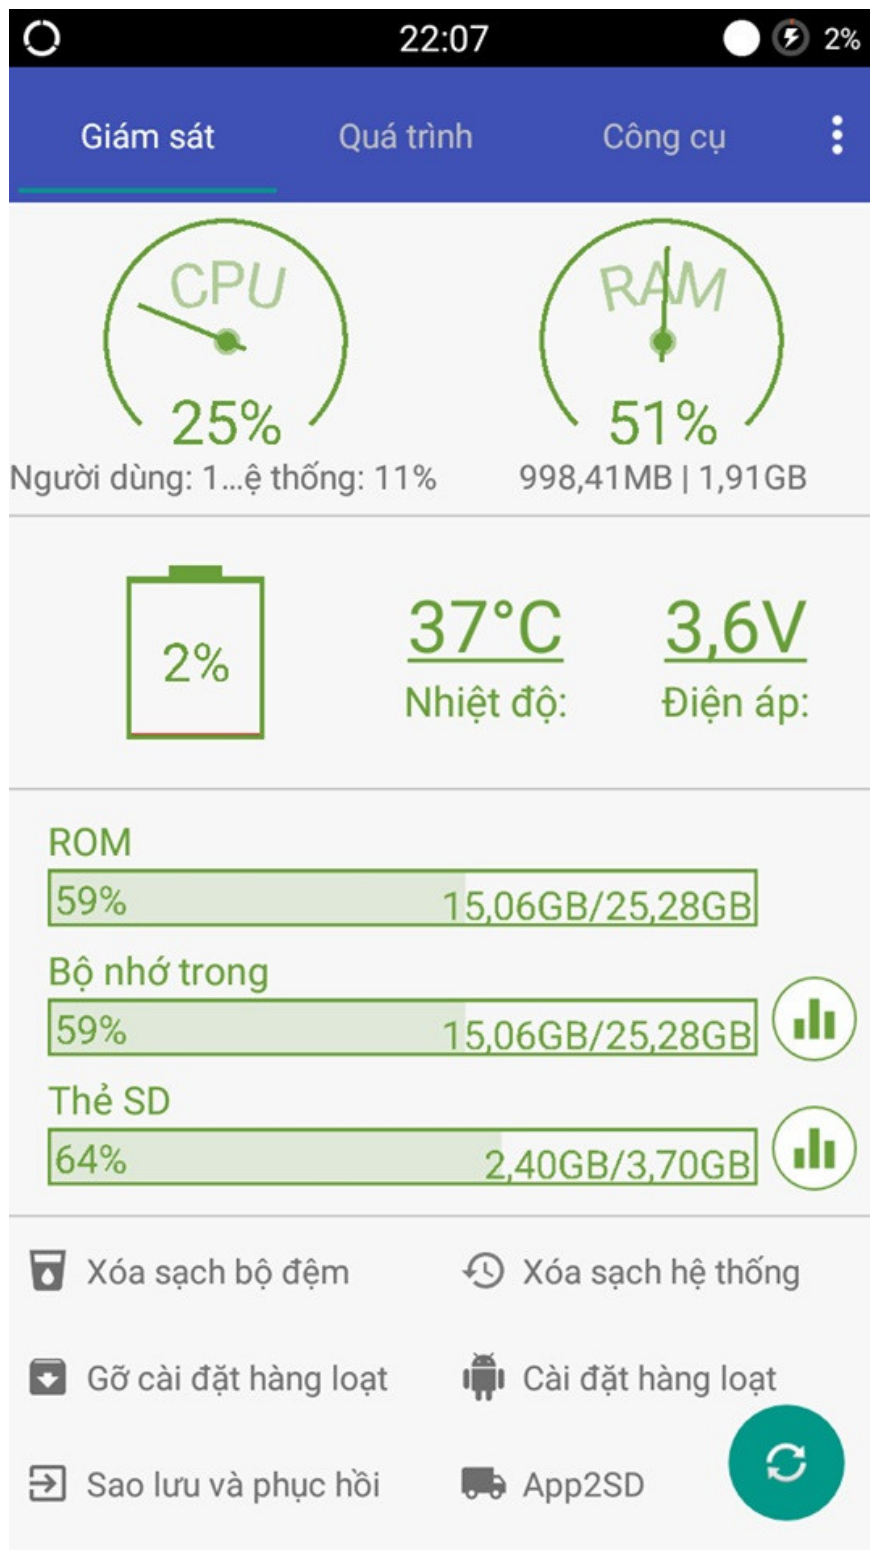

### 1. Download Parallel Space Lite

Parallel Space helps more than 80 million users log in to multiple online accounts simultaneously on the same device using a virtual system. It also protects your privacy by making the app not visible on devices that have the Anonymous Settings feature. In addition, Parallel Space Lite will provide faster performance to simulate your dual accounts through a high-speed virtual system. Now you can freely play games with multiple accounts or use sandbox to test the application.

## **8. Assistant for Android - 1MB**

1. Download Assistant for Android

This is a small tool, providing up to 18 top features to help you manage your Android phone easily and efficiently. Featured with features such as: Clear cache, Monitoring (CPU, RAM, ROM, .), File management, Boot manager, .

## 9. Google Go

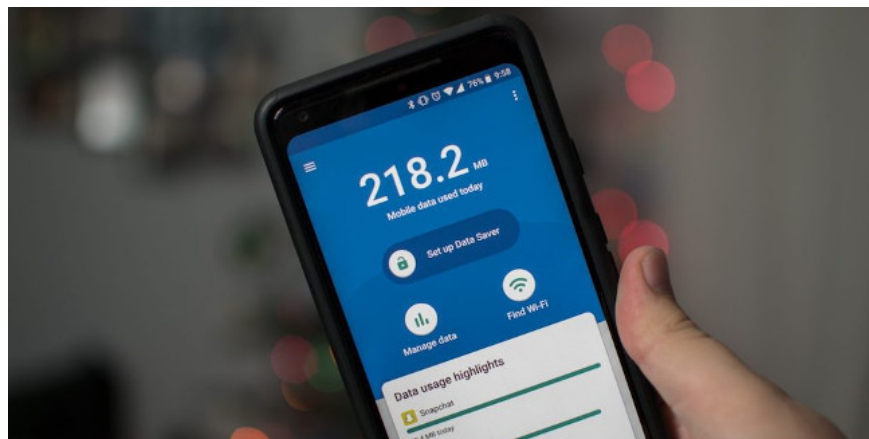

## 1. Download Google Go

Google Go is one of the best Android applications that you should install on your smartphone or tablet. In fact, Google Go is a shortened version only weighs 5MB of Google search application, which is so familiar to users on Android operating system. Although developed for devices operating in areas where the network connection is not fast, the Google Go application still supports users to search by voice and has a fast search response speed.

## 10. Datally

### 1. Download Datally

Similar to Google Go, Datally is also another application developed by Google in order to manage data usage on Android devices. By leveraging the power of artificial intelligence technology, Datally application is able to monitor data usage, block applications and services that are using too much data, and allow users to follow Monitoring visual data usage over time.
