

MacBook Air 12 'Retina has started to be mass-produced?

According to Digitimes, Quanta Computer, a Taiwanese electronics manufacturing company, began mass-producing MacBook Air 12 Retina on Apple's orders.

According to Digitimes, Quanta Computer, a Taiwanese electronics manufacturing company, began mass-producing MacBook Air 12 "Retina by Apple orders.

It is likely that the device will be available immediately in the first quarter of this year and it is an alternative to the current MacBook Air 11, while the Air 13 series will continue to be sold. The source added that Quanta is also one of the companies involved in producing Apple Watch, and in preparation for the launch of the watch, the company plans to hire another 30,000 workers in the first quarter of this year. This is an " *unusual* " thing and is often difficult due to the approaching Lunar New Year.
