

Macromedia Flash - Running text effect

With just a few simple steps you can completely create a seemingly complicated effect. You can apply this lesson as a text effect for some advertising banners or slideshows.

With just a few simple steps you can completely create a seemingly complicated effect. You can apply this lesson as a text effect for some advertising banners or slideshows.

Step 1 . Create a file with parameters like Figure 1:

Figure 1

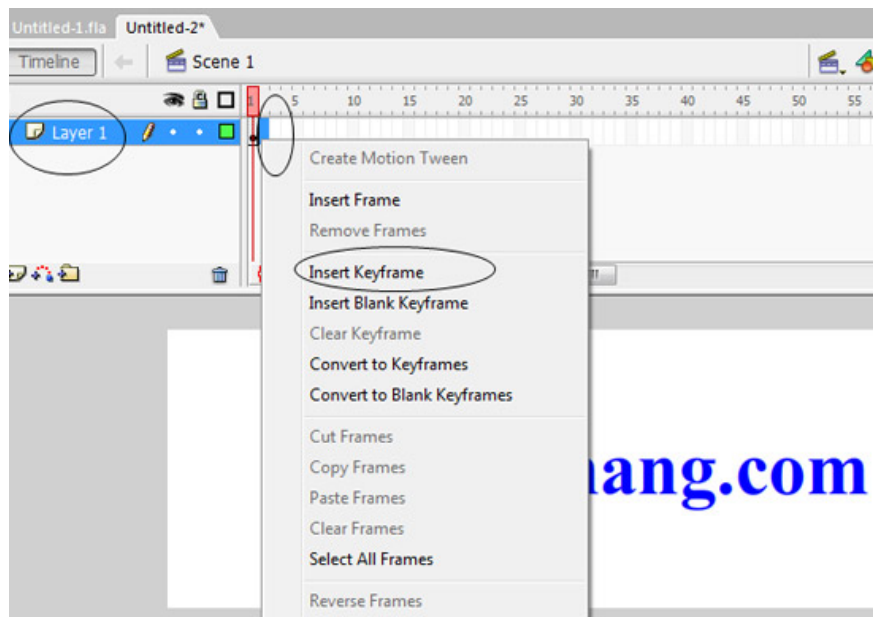

Step 2 . Select the **Text Tool** , adjust the colors, match the font size and type the words '*TipsMake.com*' .

Figure2

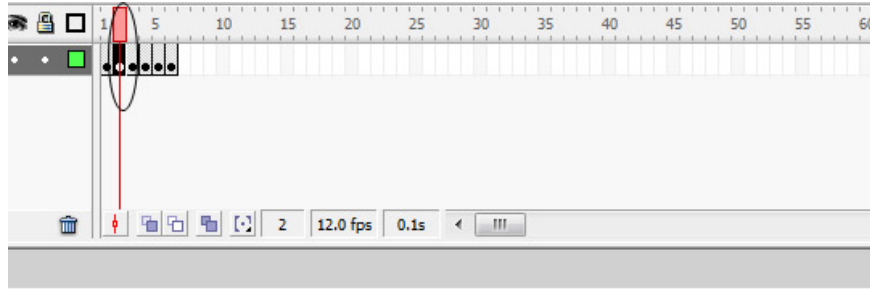

Step 3 . Right-click Frame 2 and select **Insert KeyFrame**

Figure 3

Step 4 . Do the same step Step 3 for Frames 3, 4, 5, 6, 7

Step 5 . Click Frame 2, click on the text on the canvas and set it to a different color depending on you

Quantrimang.com

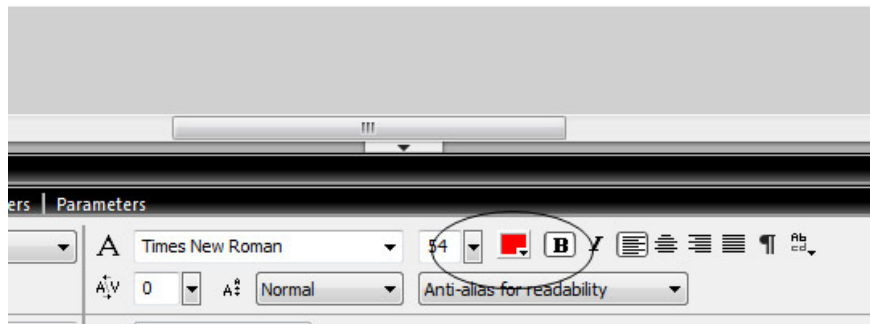

Figure 4

Step 6 . Do the same for Step 5 for Frames 4 and 6 with different colors you choose.

Step 7 . Do the same for Step 3 for Frames 8, 9, 10, .., 22

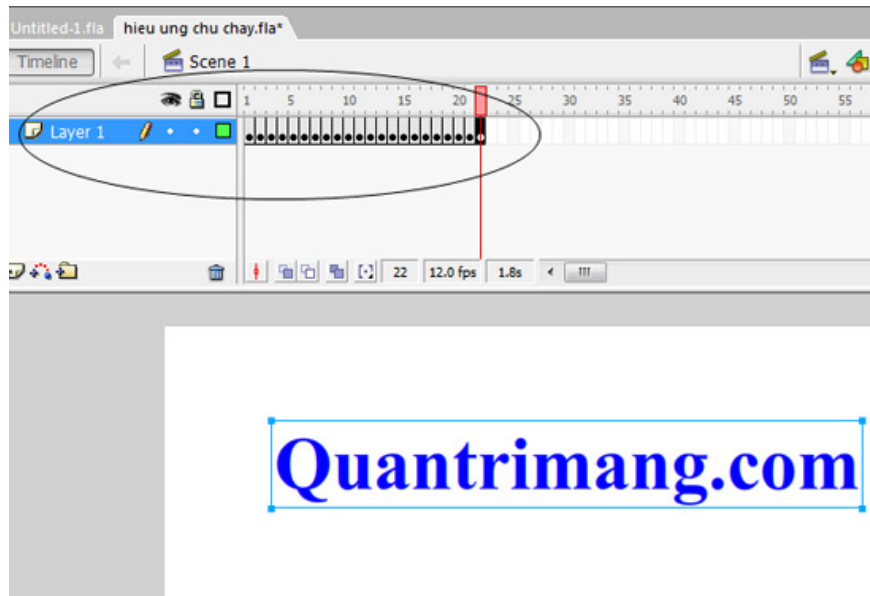

Figure 5

Step 8 . Click Frame 8, click on the **Text Tool** , blacken the letter **Q** in *TipsMake.com* and set its color to white (matches the background color, see Figure 6).

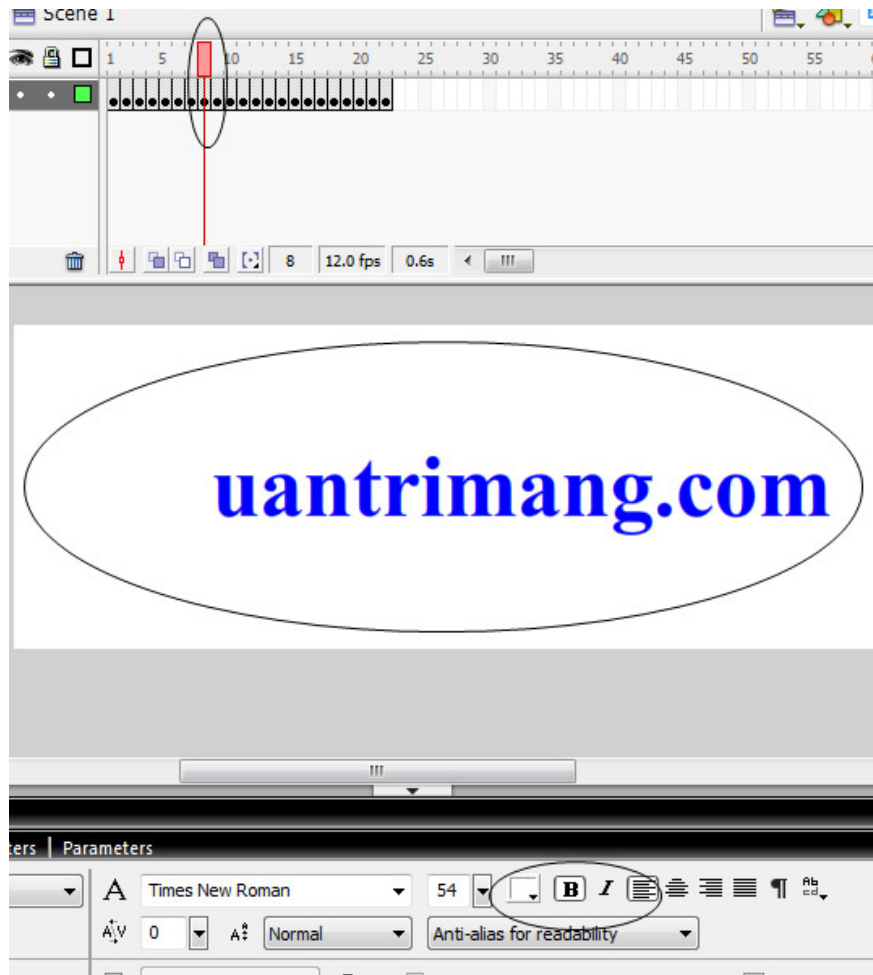

Figure 6

Step 9 . Do the same step Step 8 for the remaining frames until the end of the text.

Step 10 . Press Enter + Ctrl to check the result. Download the source file [here](#) !
