

# Make a Christmas card with Fotojet

Another Christmas season is near, and the gift is more meaningful than the cards I designed myself to give to my family and friends. But if you're not too knowledgeable about graphics tools, don't worry. Because today, TipsMake.com will guide you how to make Christmas cards online very simple and fast. Let's refer to offline.

Another Christmas season is near, and the gift is more meaningful than the cards I designed myself to give to my family and friends. But if you're not too knowledgeable about graphics tools, don't worry. Because today, TipsMake.com will guide you how to make Christmas cards online very simple and fast. Let's refer to offline.

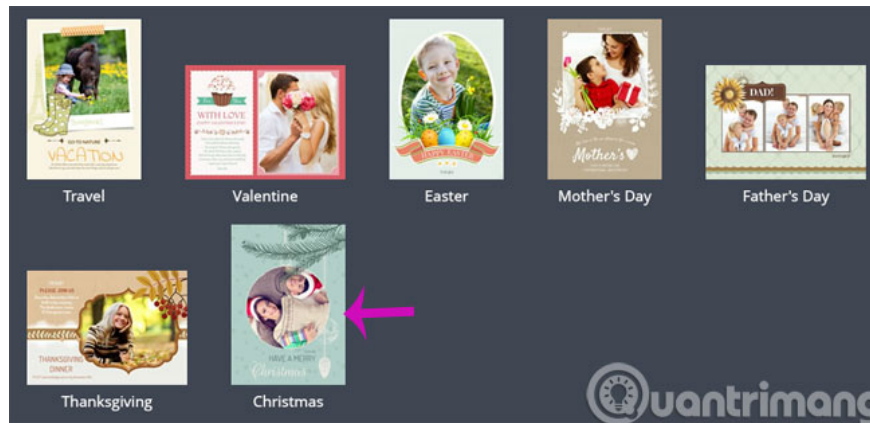

**Step 1 :** Visit the **Fotojet** homepage. Here will be 2 options for you

1. **Creative College** : Use templates available on the web
2. **Classic College** : Use photo albums on your computer

Here, we will illustrate with **Creative College** .

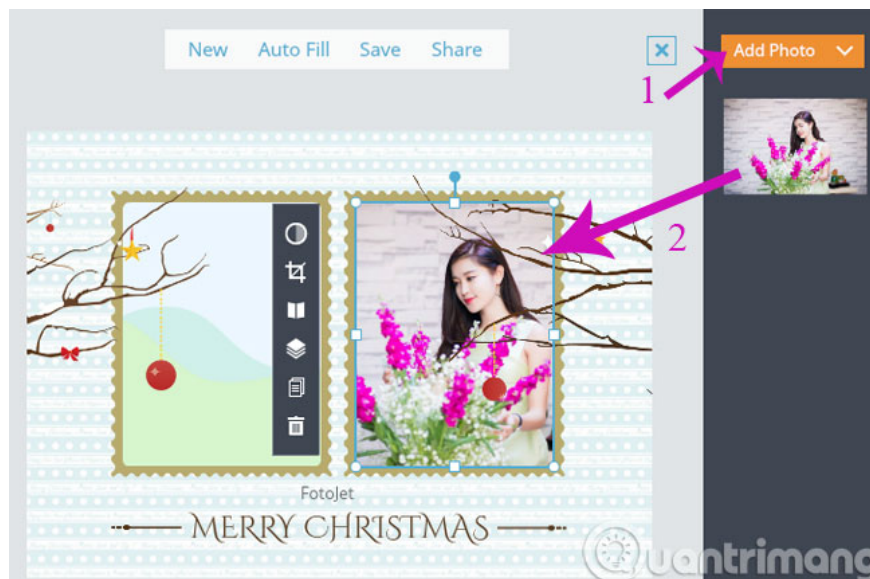

**Step 2 :** You scroll down under **Photo Card** , select **Christmas** theme

**Step 3 :** In the **Template** section, select the photo frame that I find the best

**Step 4 :** Left-click, hold and drag the image from the right column into the picture frame. (You can add photos from your computer or Facebook as you like)

**Step 5 :** Click on the image to appear various options, from the top down:

1. **Effect** : Photo effects (image type, opacity, brightness .).
2. **Crop** : Cut, resize the picture frame.
3. **Rotate & Flip** : Rotate photos.
4. **Layer** : Optional layer for photos.
5. **Duplicate** : **Duplicate the image.**
6. **Delete** : Delete the image.

**Step 6** : You can add greetings to the card by clicking on the **Text** menu in the left column and then select the font and write on the card

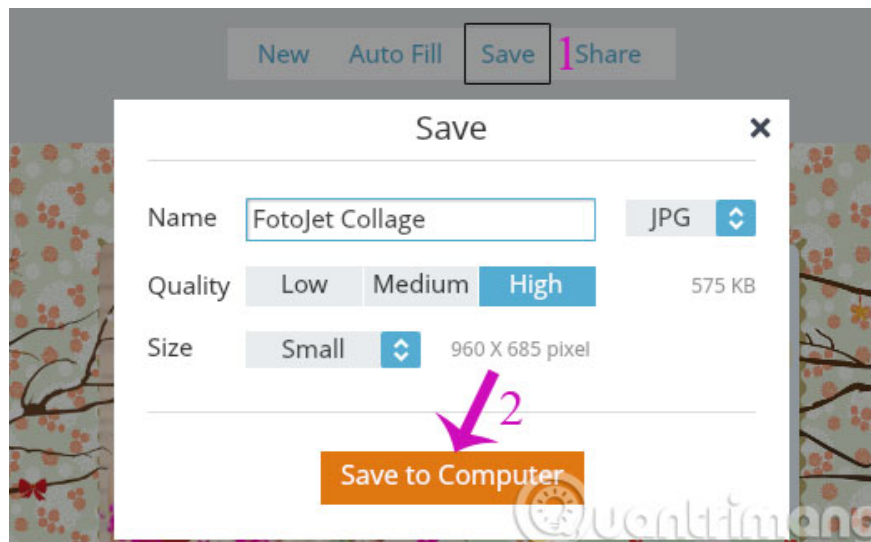

**Step 7** : Also in the left menu column, you can select **Clipart** to insert cute Emoji for the card

**Step 8 :** In addition, you can also change the card background with **BKGround** menu

**Step 9 :** After you have agreed with the card, press **Save** to save to your computer or **Share** to share on social network

And here is the result

So, you've just made a Christmas card for your family and friends. Very fast and simple, right?

1. PhotoShop: Create your own Christmas cards
2. PhotoShop: Create a Christmas card with a decorative sphere
3. Create Christmas cards in Photoshop

**Good luck!**
