

# Manage devices connected to iCloud on iPhone in 3 steps

Normally, to manage iCloud account, users often access its homepage. But on iOS9 operating system, you can do it right on your iPhone / iPad. This is necessary because when you delete a device that is connected to the iCloud account, all iCloud-related activities will be stopped until you log back on the device itself.

Normally, to manage iCloud account, users often access its homepage. But on iOS9 operating system, you can do it right on your iPhone / iPad. This is necessary because when you delete a device that is connected to the iCloud account, all iCloud-related activities will be stopped until you log back on the device itself.

If you do not know how to do it, please refer to the instructions below.

**Step 1** : At the main screen interface of iPhone, click **Settings** , select **iCloud** and then click on iCloud account on the device.

2:27 PM

iCloud

iTunes & App Store

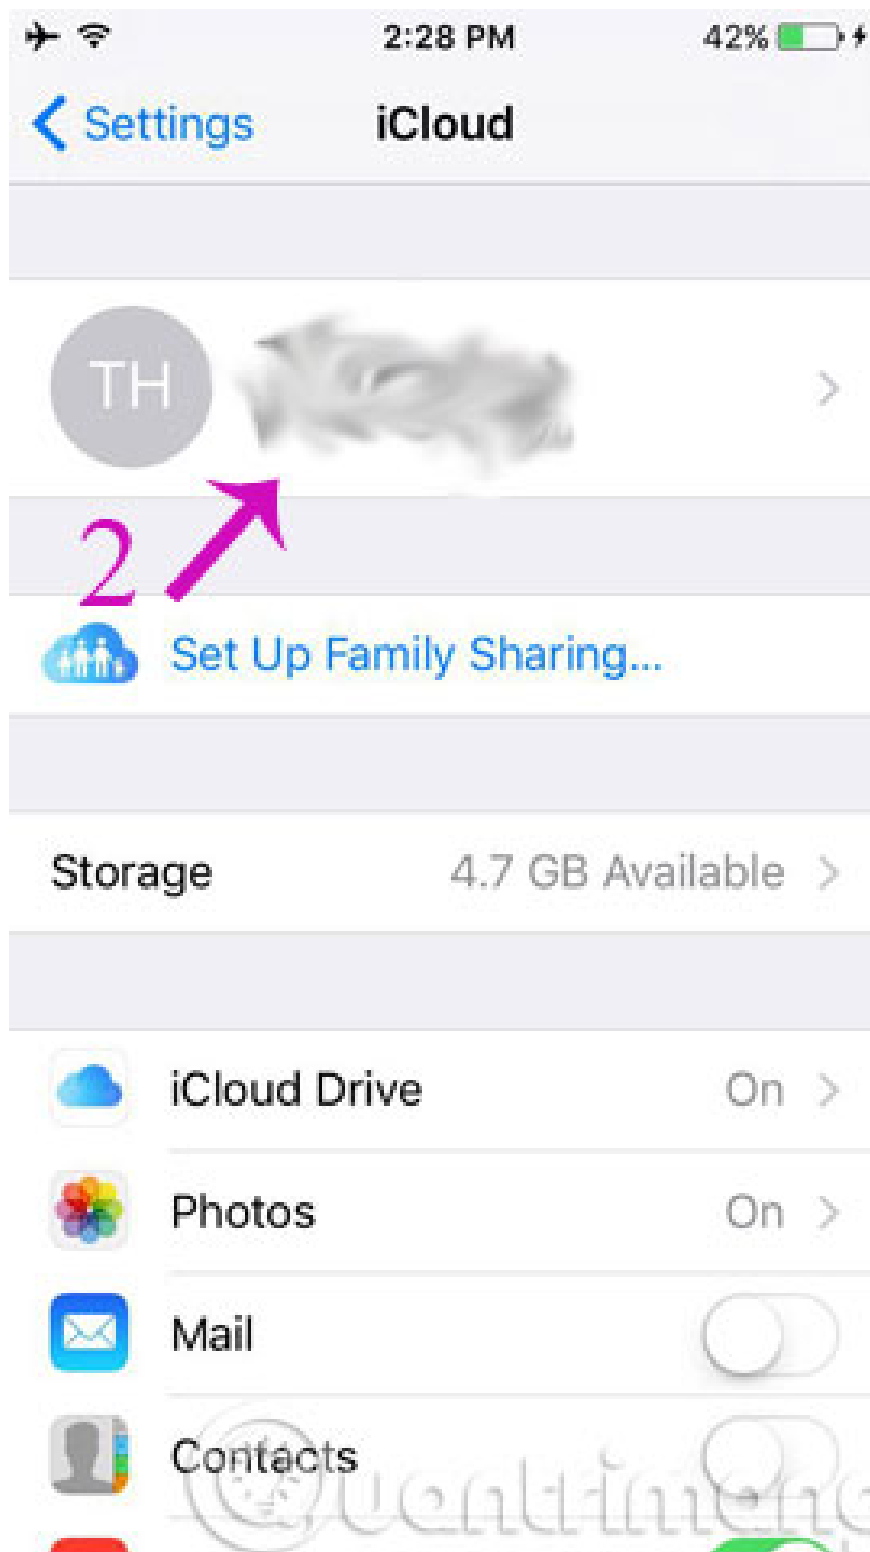

Mail, Contacts, Calendars

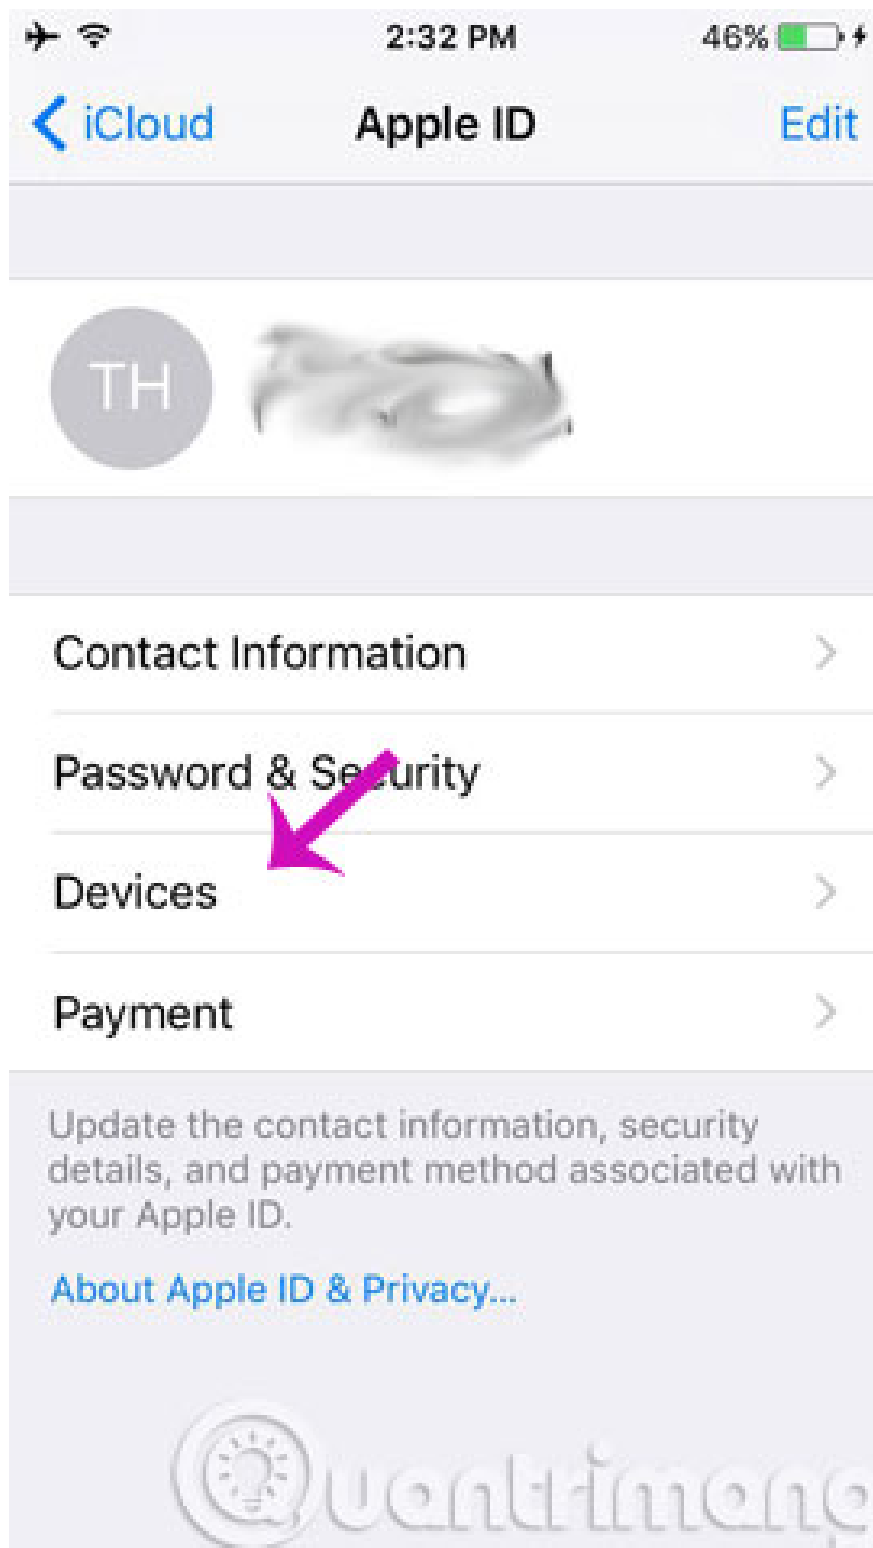

Notes

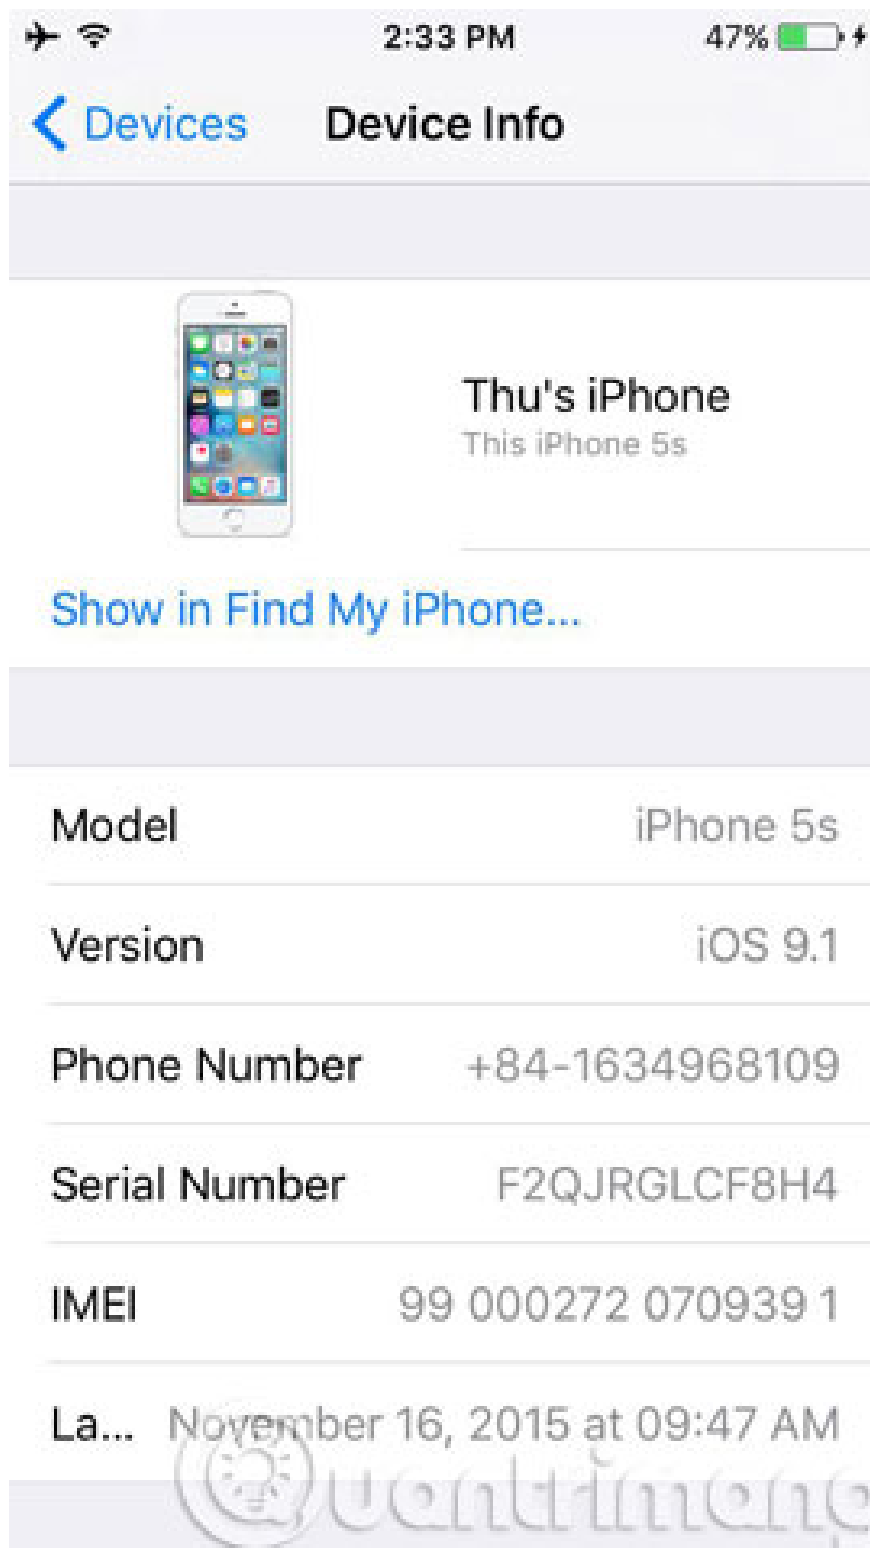

Reminders

**Step 2** : After that, the device will ask for a password. Entering the iCloud password will bring up a new dialog box, click **Devices**

**Step 3 :** Here will appear a list of devices connecting to iCloud account. You can click on any device to view the information.

1. How to create an iCloud account for free on your phone
2. How to change iCloud password?
3. Disable the iCloud account change function on iOS
