

Marvel at the incredible beauty of chemical reactions

When viewed from a close-up perspective, chemical reactions have a beauty that is hard to expect.

Chemical reactions are not as dry as what we learned in school chairs. When viewed from a close-up perspective, chemical reactions have a beauty that is hard to expect.

1. Thankfully, the periodic table is easy to understand.
2. Amazing discovery, chemical elements do not follow quantum mechanics theory
3. How scary is the poison VX, the most terrifying neurotoxin in the world?

In Beauty of Science project to attract people interested in science, Chinese photographer Wenting Zhu has made many impressive videos that simulate the chemical reactions in life that deserve to be admired. .
