

# Maximize the computer volume with Sound Booster

There are also software that increase the volume beyond the 100% threshold of computers, but these software become useless when we use Internet browsers like Chrome or Firefox to watch movies, listen to music. So what to do now? We recommend you to use Sound Booster.

There are also software that increase the volume beyond the 100% threshold of computers, but these software become useless when we use Internet browsers like **Chrome** or **Firefox** to watch movies, listen to music. So what to do now? We recommend you to use **Sound Booster** .

1. Trick to turn on individual tab off sounds on Chrome
2. Troubleshoot audio loss problems in Windows
3. How to block Facebook Messenger notification sound on iPhone

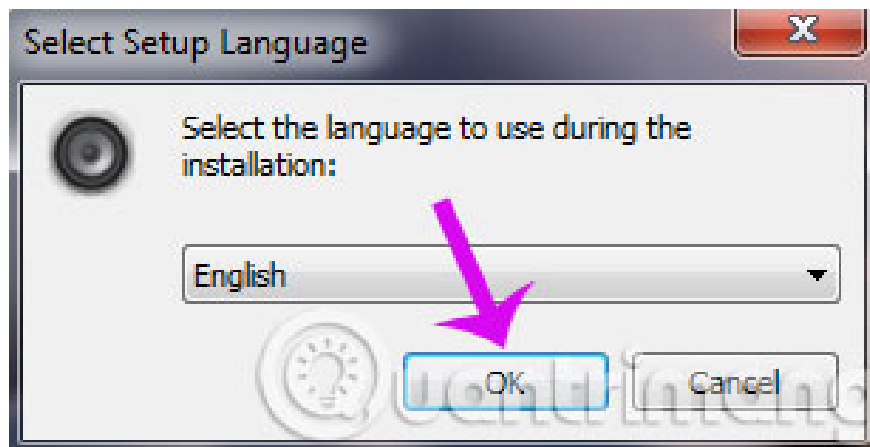

This is software that not only increases the volume of the speaker when listening to music, watching movies, but also works with Internet **calls** like with **Skype** . With many reasonable and appropriate customization for users, this is the option that you need when you have audio problems.

## Some points to note:

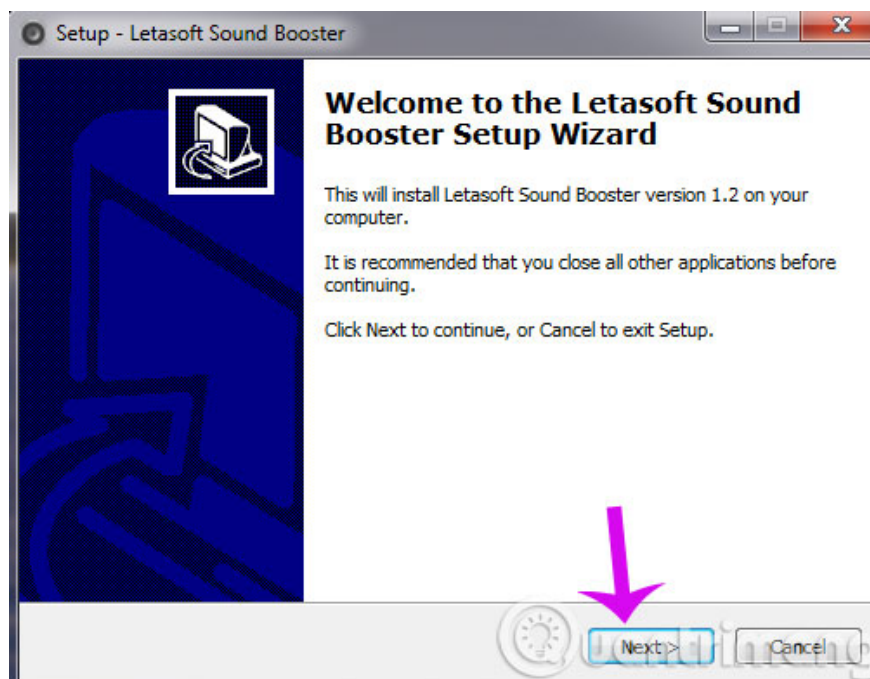

1. Sound Booster has the ability to start automatically with the computer.
2. You can create shortcuts to increase or decrease the volume.
3. The sound that Sound Booster can increase is more than 500 times the original audio level.
4. Should adjust the sound to a moderate level, if it is too loud it may cause loud or broken speakers (if your speaker capacity is exceeded).

## Doing:

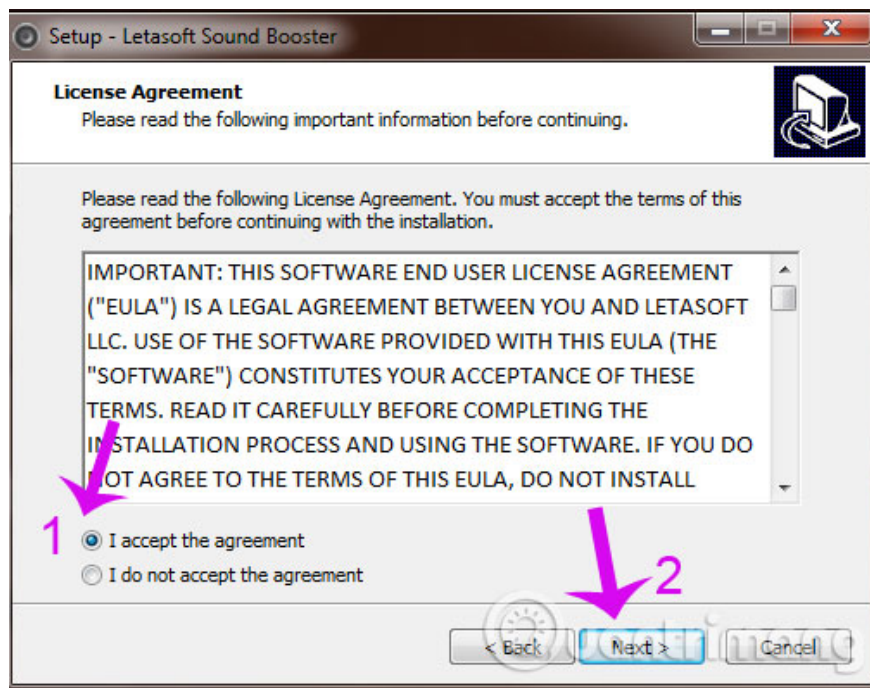

First, download the Sound Booster software and proceed with the installation as usual.

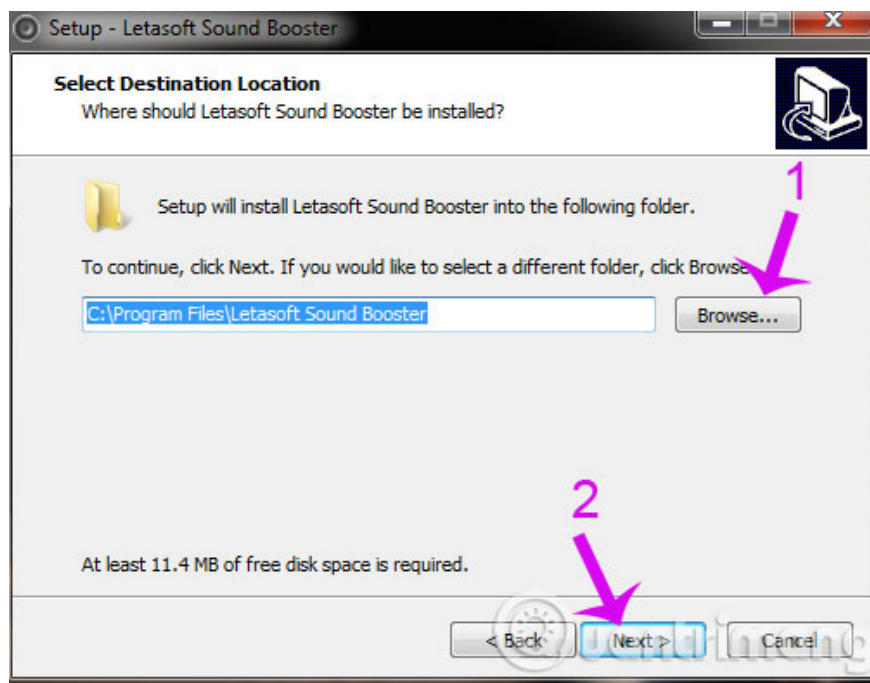

Select **Next** to continue.

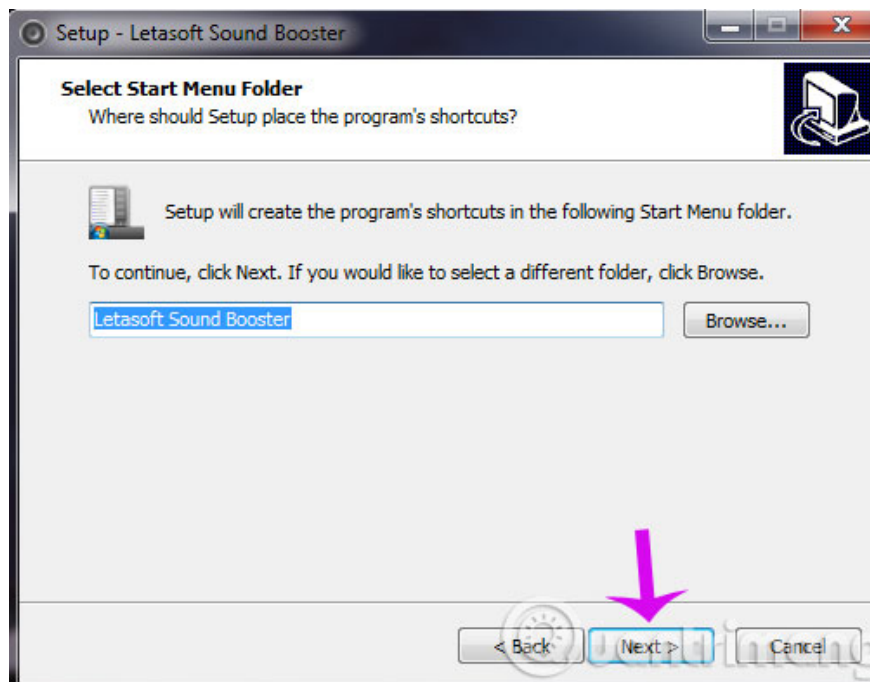

Tick the box **I accept the agreement** , then click **Next** .

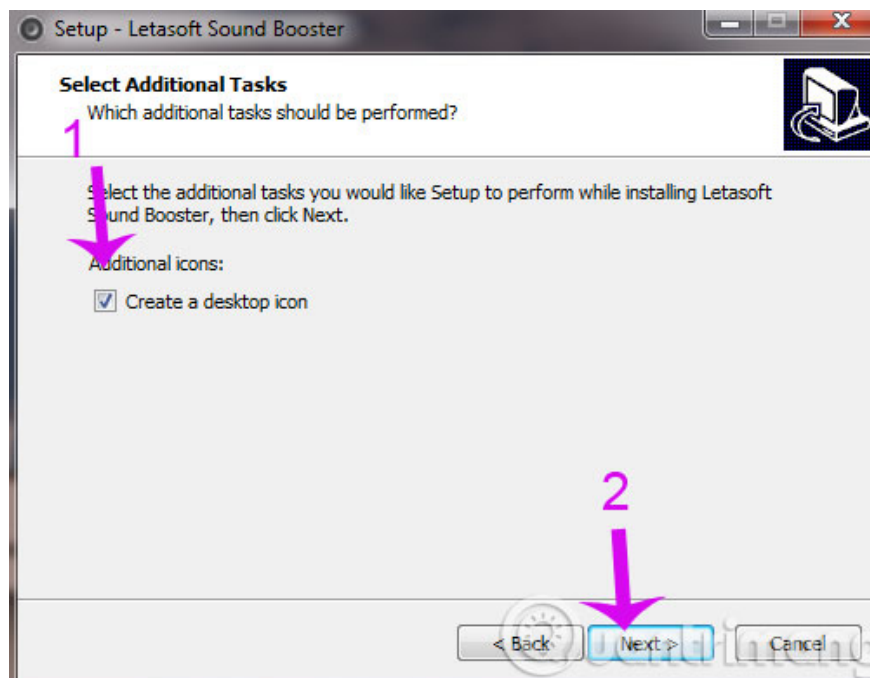

Left-click on **Browse** to select the location where you want to install the Sound Booster volume up application. When done, click on **Next**.

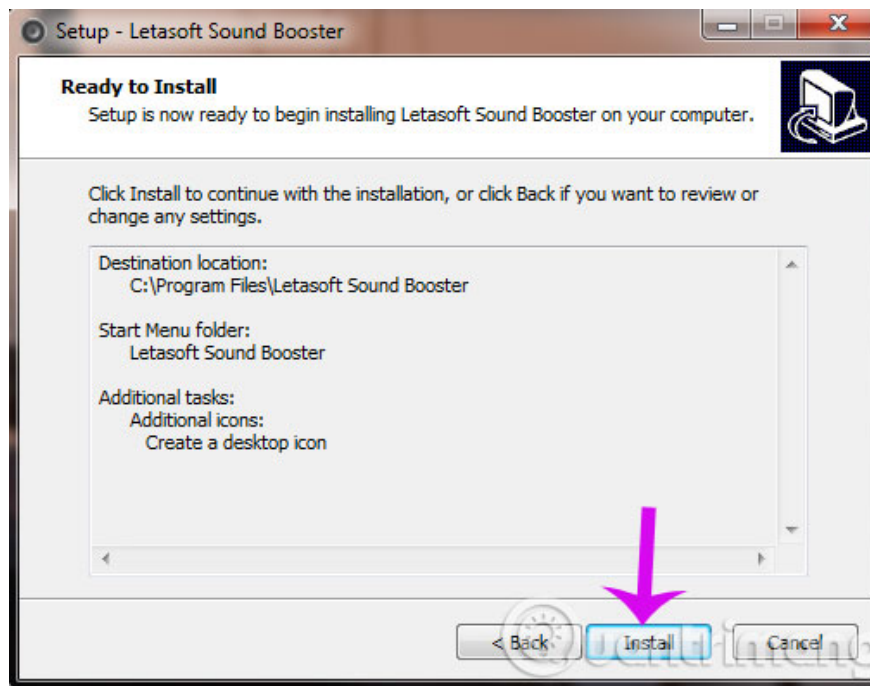

If you want, you can rename the file and click on **Next** to continue.

Check the **Create a desktop icon** box to create an icon on the desktop and click **Next** to continue

Continue clicking **Install** .

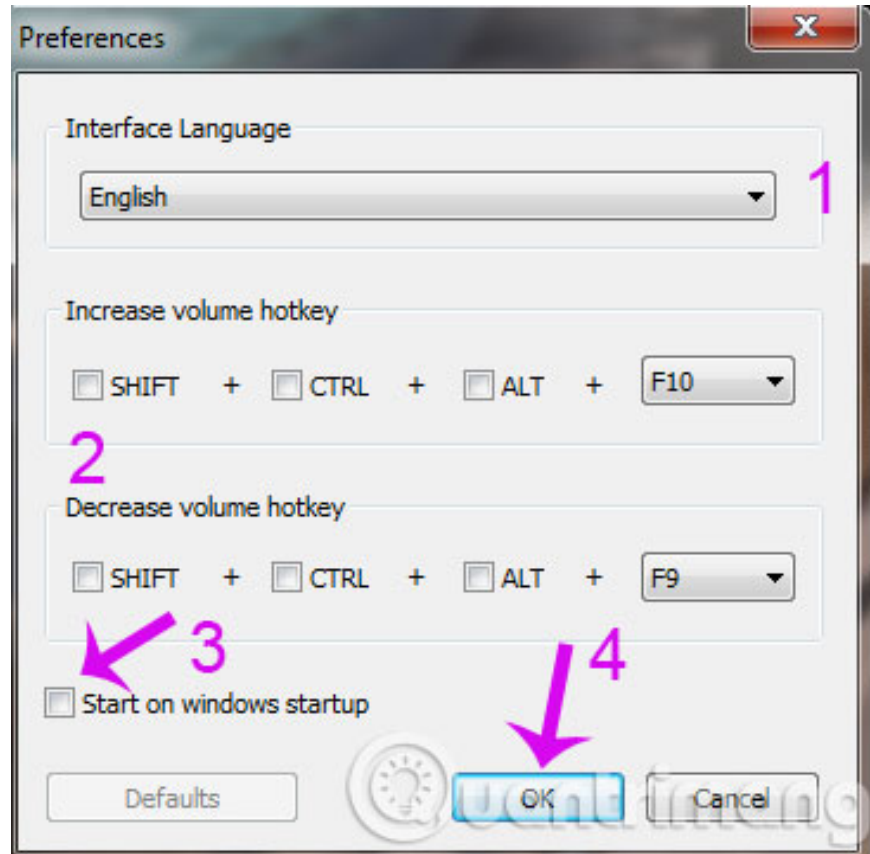

Wait a moment for the installation process to complete. When the installation is completed, a small speaker icon will appear in the Taskbar, you click on it, then increase or decrease the volume at will.

# Sound Booster

Enable

Sound Booster also allows users to create quick shortcuts or options to start with the computer by right-clicking on the Sound Booster icon, select **Options** . When the **Preferences** window appears, you can select a language, or a quick shortcut for Sound Booster, then **OK** to finish.

So, we have just shown you how to maximize the volume of your computer with Sound Booster. Hopefully, through this article, you will be able to overcome the small sound situation of your computer.

**Good luck!**
