

Maximum index of Pokemon in Pokemon GO

In Pokémon Go, each type of Pokémon has its own Combat Power (CP) and Hit Points (HP) stats. CP points will determine the fighting power of each Pokémon in battle.

The heat of Pokémon Go has not shown any signs of cooling since its debut, especially Pokémon Go has been officially present in Vietnam, making the wave of catching Pokémon more exciting than ever. For each coach, being able to own a large number of Pokémon is a type of Pokémon with a large share, which will play an important role in helping you dominate in matches.

Each type of Pokémon has Combat Power (CP) and Hit Points (HP) stats. HP can be lost during battle, protecting GYM. Also, the CP of each Pokémon type will be different and determine the fighting power of each type in the battle. For example, in your hand, there are 2 Eevee warriors, but not sure if their CP points are the same.

During the selection process, gamers will prioritize those with high CP points and train them to increase their combat ability. Thus, defensive defense crafts will be much more consolidated. In this article, we will summarize the maximum CP scores of 150 Pokémon so that gamers can calculate Pokémon capture, as well as a Pokémon training plan.
