

# McDonald's chicken piece shaped like the character in Among Us is being sold for \$ 39,877

A piece of McDonald's chicken shaped like the characters from Among Us is selling for nearly \$40,000 on eBay.

According to Neowin, on eBay, a piece of chicken shaped like the characters in Among Us sold for \$ 39,877 and has had 148 auctions so far. According to eBay, this chicken ball is part of McDonald's BTS meal and has a 14-day shelf life. That is, the piece of chicken in the shape of the Among Us character has been processed and delivered frozen after auction.

The chicken piece was originally sold for \$0.99, but has skyrocketed since then. Among Us' official Twitter account is also promoting and it is possible that this piece of chicken will cost more.

Interestingly, the Xbox Twitter account also joined in on the "fun" and shared that this chicken should come with Chinese Sichuan sauce. Therefore, eBay will also serve customers this kind of dip if they ask for it.

At this point, anyone can guess how high the auction price will be. The winner will get to own this 'exciting freak' chicken after the auction ends on June 4. Until then, you can try out Among Us on PC as it's currently free. fee.

Among Us is an online multiplayer video game developed by Inner Sloth and released on June 15, 2018. However, it was not until 2020 that the game suddenly gained popularity after Many celebrities on Youtube play.

The game is set in outer space, where the player plays one of two roles: the majority of players act as crew members (Crewmates) and a few are impostors (Impostors). . Crewmates will have to find and eliminate Impostors and complete assigned missions, while Impostors must destroy the crewmate without being detected and denounced by anyone.
