

Error codes in Among Us and how to fix error Among Us

Understanding the meaning of the error codes in the game Among Us will help you know when to ignore them, when you can continue to join the game. Below is the error code and how to handle the error Among Us.

A good game with too many players at once can't avoid the error and so is Among Us. However, do not worry, Among Us errors are often found extremely easy to fix.

Common error codes in the game Among Us

1. The game you tried to join is full. Check with the host to see if you can join next round

Among Us might be an overload or a server error. If the game is not "full" yet, you may have to try again and again to enter the game. If you're playing with your friends and know the lobby has room, just reload the game.

2. The game you tried to join already started. Check with the host to see if you can join next round

You have joined a game Among Us going on or may be due to the game system confusion. If you're playing with your friends and know the game hasn't started yet, just try re-entering the game room until it's successful.

3. You disconnected from the server. Reliable packet 1 (size = #) was not ack'd after #ms

Among Us's servers are down or being overloaded. Try reconnecting, changing host areas (click the orb icon in the lower right corner) or wait a bit before trying again.

4. You disconnected from the server. Could not send data as a SocketException occurred: Network is unreachable

According to Redditors, Among Us mobile returns this error when someone tries to play on a Sprint data connection. Switching to a Wi-Fi connection might fix the problem.

5. The Among Us matchmaker is full. Please try again in a few minutes!

Too many people are playing. You can either change server zones or wait for peak hours.

6. You disconnected from the server. Sent # pings that remote has not responded to

The server is having trouble connecting to your client. Make sure the network you are using is stable, especially Wi-Fi. Check your network speed to determine this issue. If the connection is fast and stable, how to fix this Among Us error is very simple, just change to another server.

7. Forcibly disconnected because: ReliablePacketWithoutResponse

Less common than the above Internet error, but you can apply the same solution to fix the problem. The above problem occurs because the game servers are overloaded. At this point, check your network speed to make sure your Internet connection is stable and try downloading the game again.
