

# Messenger Beta for Windows 10 has officially appeared on the Microsoft Store with many interesting features, can be downloaded now!

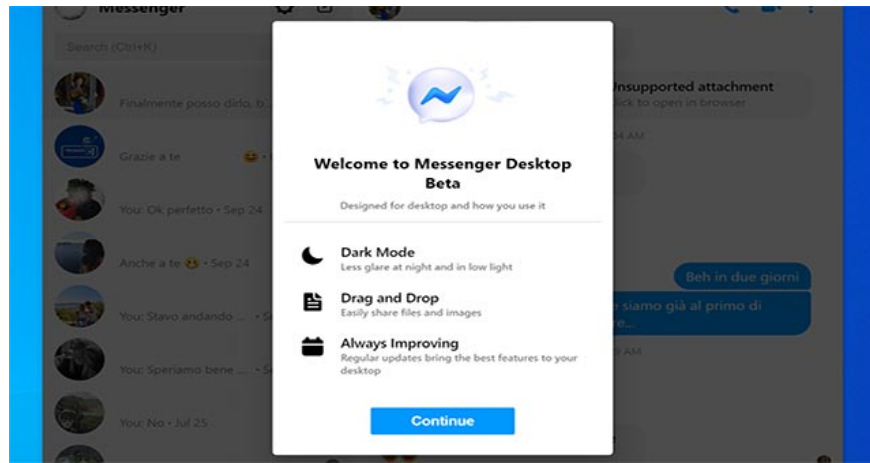

Facebook has just announced the announcement of adding more important features to the Windows 10 Messenger Beta app.

Facebook has just announced the announcement of adding more important features to the Windows 10 Messenger Beta application. If Messenger Beta is not installed on your computer, you can download it directly on the Microsoft Store. In case you are using Messenger Beta, new features will be sent as an application update, specifically as follows:

1. The feature to permanently delete sent messages
2. Add new themes (dark background theme, gray background theme)
3. File sending feature
4. Full screen mode
5. Features hidden conversation
6. New icon
7. Add emoticons

Facebook will roll out new updates by region, if you haven't already, wait patiently for a few more days.

Messenger for Windows 10 is still in the public testing phase, but with the additional appearance of the above features, it can be said that this application has quite a number of necessary utilities such as versions. Mobile was originally launched a long time ago. In the latest update, Messenger for Windows 10 has also updated many valuable features such as voice and video calling, Live Tile, sharing photos, videos, GIFs, as well as the ability to create group chats and search. .

Earlier on March 9, 2019, a Windows fan site in Italy called WindowsBlogItalia revealed for the first time a series of screenshots of the Facebook Messenger application on Windows 10, and mentioned a number of features and how to use it on Windows 10 computers and tablets. After a month, Facebook announced the launch of Messenger for Windows 10 Beta in Microsoft Store, allowing users to download and spread Unlimited experience.

You can download the Messenger app for Windows 10 at the following address: <https://www.microsoft.com/en-us/p/messenger/9wzdncrf0083?activetab=pivot:overviewtab>
