

Microsoft began to put Cortana on Skype apps on Android and iOS

Recently, Microsoft began testing the integration of virtual assistant Cortana with Skype users on Android and iOS devices, taking advantage of the virtual assistant's intelligence to display useful information in conversations. . Since October 9, Microsoft has been preparing to integrate this integration into all users.

Recently, Microsoft began testing the integration of virtual assistant Cortana with Skype users on Android and iOS devices, taking advantage of the virtual assistant's intelligence to display useful information in conversations. . Since October 9, Microsoft has been preparing to integrate this integration into all users.

In the latest blog post on Skype, Microsoft said Cortana is starting to deploy Skype applications on mobile devices running Android and iOS. This virtual assistant will exist in two main ways. First, you'll see Cortana exist in your chats on Skype, giving useful information based on the chat content you're referring to. For example: If you and your friends are discussing going out to eat or watching movies, Cortana will suggest restaurants and review movies, the virtual assistant will also give clever answers like feedback and automatically suggest to create reminders when discovering you are talking about an upcoming event.

1. How to change the Skype name, change the display name on Skype
2. How to turn off friend birthday notifications on Skype

If you are a regular Facebook Messenger user, you will find Cortana on Skype quite familiar because it is similar to what Facebook does on mobile devices, giving quick answers based on the story context.

Besides, Cortana will also exist as a friend on your Skype list. Microsoft said: *"You can ask Cortana to check the status of your flight, give you a stock quote or suggest the best restaurants in your area, ."*

According to information from Microsoft, Cortana integration on Skype will gradually be deployed on Android and iOS. At this point, you can search Skype on Google Play and the App Store to check out these new features.
